Effects of Moderate-Intensity Exercise with Momordica Charantia L. on serum Glycemic indexes, reverse cholesterol transport elements and Lipocalins (RBP-4 and Lcn-2) in Men with Type 2 Diabetes

Protocol summary

Study aim

The aim of this study was to examine the Protective Effect of aerobic training along with Momordica charantia L on Hyperglycemia control indexes reverse cholesterol transport elements and Lipocalins (RBP-4 and Lcn-2) in man with type 2 diabetes.

Design

36 men with type 2 diabetes selected from Tehran and randomly divided into four groups (Control-Water, Control-Momordica charantia, Control-Training and Momordica charantia+Training). Training group's perform Aerobic Training for for eight weeks, three sessions a week (40% to 70% of the reserved heart rate and for 15 to 45 min). Control-Momordica charantia and Momordica charantia+Training will feed 2000 mg of Momordica charantia for eight weeks (Twice a day before breakfast and dinner).

Settings and conduct

Intervention Research, Tehran City The location of the research is the Iran Football Medical Assessment and Rehabilitation Center (IFMARC), which has already been coordinated. In this research, people who work with subjects are blinded.

Participants/Inclusion and exclusion criteria

Inclusion criteria: Type 2 Diabetes; Not having regular physical activity; Without receive insulin Exclusion criteria: Have Heart and Kidney failure; Inability to Training; Have Musculoskeletal Disorders

Intervention groups

Aerobic Training and Momordica charantia L

Main outcome variables

Effect of aerobic training with Momordica charantia L on Hyperglycemia control indexes such as: GLP-1, DPP-4, GLP, Glucose, Insulin, Insulin resistance and APO-a1, APO-E, Lcn-2, RBP4

Scientific title

Effects of Moderate-Intensity Exercise with Momordica Charantia L. on serum Glycemic indexes, reverse cholesterol transport elements and Lipocalins (RBP-4 and Lcn-2) in Men with Type 2 Diabetes

Public title

Effect of training and Momordica charantia L on diabetes

Purpose

Health service research

Inclusion/Exclusion criteria

Inclusion criteria:

Type 2 Diabetes Not having regular physical activity
Without receive insulin At least 45 years old

Exclusion criteria:

Have Heart and Kidney failure Inability to Training Have
Musculoskeletal Disorders

Age

From **45 years** old to **60 years** old

Gender

Male

Phase

N/A

Groups that have been masked

- Participant

Sample size

Target sample size: **36**
More than 1 sample in each individual
Number of samples in each individual: **9**
Men with Type 2 Diabetes

Randomization (investigator's opinion)

Randomized

Randomization description

In this research, subjects are selected Simple randomization by random allocation rule. After determining the sample size, they will be equally divided into four groups (Control-Water, Control-Momordica charantia, Control-Training and Momordica charantia+Training).

Blinding (investigator's opinion)

Single blinded

Blinding description

The Control-Momordica charantia and Momordica charantia+Training patients receive Momordica charantia (2000 mg/day), two capsules orally of 500 mg twice daily before breakfast and dinner for 8 weeks. Control-Water and Control-Training groups receive placebo in the same pharmacological presentation. Starch is used as placebo.

Intervention groups

1

Description

Control group: in this group we have not any intervention during 6 weeks, and will consider this group as placebo.

Category

Placebo

2

Description

Intervention group: Training group (in this group for six week, three session/weeks), the training start with 10 min warming and then 25 min training with 60 Vo2max, on go up to every day 2 min increase to the training time up 45 min until the end of intervention with 75 vo2 max).

Category

Treatment - Other

3

Description

Intervention group: Momordica charantia group (in this group eat 2000 mg of Momordica charantia for eight weeks Twice a day before breakfast and dinner).

Category

Treatment - Other

4

Description

Intervention group: Momordica charantia- Training group (In this group the Simultaneous intervention, Momordica charantia and training, will treat with the same protocol that describe at the previous part).
