

Clinical Trial Protocol

Iranian Registry of Clinical Trials

16 Sep 2026

A Clinical trial to study the effect of motivational interview on adherence to therapy, self-efficacy and self-management in adolescents with asthma

Protocol summary

Study aim

The purpose of this study was to determine the effect of motivational interview on adherence to treatment, self-efficacy and self-management in adolescents with asthma.

Design

In this research, 72 adolescents with asthma who are eligible for inclusion in the study will be selected and will be randomly assigned to two groups of test and control, and will be assigned a unique code to each participants.

Settings and conduct

After sampling from Vali-e-Asr Hospital clinic and obtaining written consent from parents, for both groups will be completed demographic information and medical adherence questionnaire, self-efficacy and asthma self-management questionnaire. The intervention group is then randomly divided into three subgroups of 12 people and a motivational interview will be conducted in 5 weeks and one week each week. and the control group will not receive any intervention. After and three months after the intervention, will be completed the Asthma adherence and self-management and self-management Questionnaire.

Participants/Inclusion and exclusion criteria

Diagnosis of asthma from a year ago or more by a specialist physician; being at the age of 9-15 years

Intervention groups

In the intervention group, the motivational interview will be conducted in accordance with the Miller and Ronik principles in 5 sessions. The structure of weekly meetings from a group intervention book will be derived from a five-session motivational interview. The control group will not receive any intervention.

Main outcome variables

Main outcome variables: Adherence to therapy, self-efficacy and self-management

Scientific title
A Clinical trial to study the effect of motivational interview on adherence to therapy, self-efficacy and self-management in adolescents with asthma

Public title
The Effect of Motivational Intervewing on treatment adherence , self-efficacy and self-management among adolescents whit asthma

Purpose
Supportive

Inclusion/Exclusion criteria
Inclusion criteria:
Asthma diagnosis from one year or more by a specialist
Parent's informed consent and person's willingness to participate in the study
Having a 9-15 age
Having reading and writing skills
Using at least one inhaler
Exclusion criteria:
Having no mental problems

Age
From **9 years** old to **15 years** old

Gender
Both

Phase
N/A

Groups that have been masked
No information

Sample size
Target sample size: **72**

Randomization (investigator's opinion)
Randomized

Randomization description
A simple randomization is that a number is chosen between 1 and 10 in a draw and placed in the intervention group, then will be placed every other individual into two groups.

Blinding (investigator's opinion)
Not blinded

Blinding description

Placebo
Not used

Assignment
Parallel

Health conditions studied

1

Description of health condition studied
Asthma
ICD-10 code
J45.9
ICD-10 code description
Asthma, unspecified

Primary outcomes

1

Description
Adherence to Therapy
Timepoint
Before intervention, After intervention, three months after intervention
Method of measurement
Self-Reporting Questionnaire on Adherence to Therapy and Asthma Control

2

Description
Self-Efficacy
Timepoint
Before intervention, after intervention, three months after intervention
Method of measurement
Asthma Self-Efficacy Questionnaire

3

Description
Self-management
Timepoint
Before intervention, After intervention, three months after intervention
Method of measurement
Self-Management 21 Item Questionnaire

Secondary outcomes
