Clinical Trial Protocol
Iranian Registry of Clinical Trials

11 Sep 2026

phase I clinical trial placental mesenchymal stem cell therapy for the treatment of type 1 diabetes mellitus

Protocol summary

Study aim
main goal is to access the safety of treatment with placental mesenchymal stem cell in new onset T1DM patients.

Design
10 eligible new onset T1DM patients with 12-18 yr age will be enrolled in this phase one clinical trial. no blinding and single group clinical trial will be done and placental mesenchymal stem cell will be transplanted with clinical grade standard .

Settings and conduct
new onset T1DM patients with less than 6 month from Diagnosis will be enrolled. intravenous injection of clinical grade placental mesenchymal stem cell-which cultured in endocrinology and metabolism research institute- will be done after taken inform consent from patients in children medical center . before and after placental mesenchymal stem cell transplantation we will check laboratory parameter of diabetes mellitus, insulin consumption, and adverse events and visit the patients in intervals before and after transplantation for 1 year.

Participants/Inclusion and exclusion criteria
inclusion criteria both gender 12-18 years old type one diabetes mellitus at least one positive auto antibody of T1DM in first 6 month of diagnosis Exclusion criteria malignancy simultaneous auto immune disorders pregnancy DKA presentation chronic disorder

Intervention groups
transplantation of placental mesenchymal stem cell from peripheral vein and with dose 2 million per new onset diabetic patient kilogram weight

Main outcome variables
HbA1c level; c-peptide level; T1DM auto antibodies; FBS and PPG; insulin requirment

Scientific title
phase I clinical trial placental mesenchymal stem cell therapy for the treatment of type 1 diabetes mellitus

Public title
The safety of placental mesenchymal stem cell therapy for the treatment of type 1 diabetes mellitus
Purpose
Treatment
Inclusion/Exclusion criteria
Inclusion criteria:
both gender 12-18 years old type one diabetes mellitus at least one positive auto antibody of T1DM in first 6 month of diagnosis
Exclusion criteria:
malignancy simultaneous auto immune disorders pregnancy chronic disorder other than diabetes
Age
From **12 years** old to **18 years** old
Gender
Both

Phase
1
Groups that have been masked
No information
Sample size
Target sample size: **10**
Randomization (investigator's opinion)
Not randomized
Randomization description
Blinding (investigator's opinion)
Not blinded
Blinding description
Placebo
Not used
Assignment
Single

Ethics committees

1

Ethics committee
Name of ethics committee
ethic committee of tehran university of medical science
Street address
Bolvar keshavarz street, Tehran university of medical science
City
Tehran
Province
Tehran
Postal code
1417653761
Approval date
2018-01-28, 1396/11/08
Ethics committee reference number
IR.TUMS.VCR.REC.1396.4367

Health conditions studied

1

Description of health condition studied
Diabetes Mellitus type 1
ICD-10 code
E10.9
ICD-10 code description
Type 1 diabetes mellitus without complications

Primary outcomes

1

Description
daily insulin requirement
Timepoint
Before intervention and 1,3,6,12 month after intervention
Method of measurement
daily insulin requirement per kilogram weight

2

Description
HbA1c
Timepoint
Before and 1,3,6,12 month after intervention
Method of measurement
blood sample

3

Description
c peptide level
Timepoint
Before and 1,3,6,12 month after intervention
Method of measurement
blood sample

Secondary outcomes

1

Description
life threatening major side effect
Timepoint
before and 1,3,6 ,12 months after intervention
Method of measurement
physical examination

Intervention groups

1

Description
one time placental mesenchymal stem cell transplantation -which produced in endocrinology and metabolism research institute of Tehran university of medical science- from peripheral vein to T1Dm patients with 2 million per kilogram weight dose

Category
Treatment - Drugs

Data Dictionary
Not applicable

Title and more details about the data/document
donor and recipient demographic data and recipient fallow up data

When the data will become available and for how long
from beginning to the end of the study

To whom data/document is available
principal manager /the supervisor professor /ethic committee

Under which criteria data/document could be used
for analysis of the results and searching the reason of the probable side effects

From where data/document is obtainable
PI

What processes are involved for a request to access data/document
PI acceptance ------ ethic committee acceptance ------- recording of this acceptance and the amount of data that should be given and the result that should be achieved
