A Clinical trial for comparison between side effects of subclavian and jugular vein catheters in hemodialysis patients of hemodialysis ward of Immam Hossein hospital on first half of 2011

Protocol summary

Summary

The aim of this research is recognition of subclavian and jugular catheters side effects in hemodialysis patients of Immam Hossein hospital. In this research patients divided into two groups with randomized division (case group subclavian catheter and control group jugular catheter). Inclusion criteria: All hemodialysis patients that need venous catheter without anesthesia contraindication. Exclusion criteria: All patients with anesthesia contraindication. Our sample size was 180 cases and the main outcomes for measurement were hemothorax, pneumothorax, infections and the duration of operation.

Health conditions studied**1****Description of health condition studied**

Evaluation of side effects of subclavian and jugular vein cateters

ICD-10 code

S25.1

ICD-10 code description

Injury of innominate or subclavian artery

Primary outcomes**1****Description**

Evaluation of infection

Timepoint

First day,third days and one week , two week and three week after surgery.

Method of measurement

Patient examination

2**Description**

Evaluation of hemothorax

Timepoint

First and 6 hours and after day after surgery

Method of measurement

Patient examination

3**Description**

Evaluation of pneumothorax

Timepoint

First and 6 hours and after day after surgery

Method of measurement

Patient examination

4**Description**

Evaluation of frequency surgery.

Timepoint

Prion time of surgery

Method of measurement

Time measurement at surgery

Secondary outcomes**1****Description**

Permanent prion of subclavian and jugular cateters

Timepoint

Before intervention , 2 months, 4 months and 6 months after surgery

Method of measurement

Patient examination

Intervention groups**1****Description**

Intervention group :Subclavian catheter prepare with standard(ACS) method.Our needle(N.22) is induced 2 cm below the mid clavicular line toward the supra sternal notch.We push the needle with suction and after aspiration of venous blood, put the guide wire and the fix the catheter.

Category

Treatment - Surgery

2**Description**

Control group :Jugular catheter prepare with standard (ACS)method.We put the needle (N.22)just at the top of the triangular of SCM muscles head that stuck to

clavicle and then push it with suction and immediately after aspiration of venous blood. We put the guide wire and fix the catheter.
