Scientific title

The effect of red clover vaginal cream on vaginal atrophy in postmenopausal women

Public title

Phytoestrogenic treatment of vaginal atrophy in postmenopausal women

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria:

Age range from 45 to 65 years Women with at least one year of menstruation or having a hormonal test with an FSH level higher than 40 international units with a spouse Having sexual activity The presence of vaginal atrophy

Exclusion criteria:

Vaginal bleeding with unknown cause Vaginal infection Hormone therapy or use of sex hormones 8 weeks before study Taking isoflavones in the diet History of suspected breast mass or breast cancer Hospital admission during research Unwillingness to continue the study company

Age

From **45 years** old to **65 years** old

Gender

Female

Phase

3

Groups that have been masked

- Participant
- Care provider
- Investigator
- Outcome assessor

Sample size

Target sample size: **76**

Randomization (investigator's opinion)

Randomized

Randomization description

In this study, the clinical trial is 3 blind and the total number of samples is 76, randomization is performed using computer software of random numbers. The subjects are divided into two groups of intervention and control, 38 of which were first to the intervention group and 38 The second number belongs to the control group

Blinding (investigator's opinion)

Triple blinded

Blinding description

In this study, the drugs are made by the pharmacist and coded and packaged by the supervisor, the researchers, the pharmacist and the participants are blind.

Health conditions studied

1

Description of health condition studied

Vaginal Atrophy

ICD-10 code

N95.2

ICD-10 code description

Postmenopausal atrophic vaginitis

Primary outcomes

1

Description

Vaginal atrophy

Timepoint

Before intervention, after intervention

Method of measurement

Vaginal smear

Secondary outcomes

1

Description

Dyspareunia

Timepoint

Before the intervention, two weeks after the intervention, four weeks after the intervention, eight weeks after the intervention

Method of measurement

4 degree self-rating scale

2

Description

Sexual performance

Timepoint

Before and after intervention

Method of measurement

Female Sexual Function Index (FSFI)

3

Description

Sexual satisfaction

Timepoint

Before and after the intervention

Method of measurement

Larsson Sexual Satisfaction Questionnaire

4

Description

Severity of menopause symptoms

Timepoint

Before the intervention, two, four, and eight weeks after the intervention

Method of measurement

Menopause Rating Scale Questionnaire

Intervention groups

1

Description

Intervention group: Red clover vaginal cream 2% One application once a day for 8 weeks

Category

Treatment - Drugs

2

Description

Control group: Placebo, vaginal cream, once a day for 8 weeks

Category

Placebo
