The effect of education based on the BASNEF model on abuse of the elderly in the family

Protocol summary

Study aim

checking The effect of education based on the BASNEF model on abuse of the elderly in the family

Design

Quasi-experimental, interventional and control groups with pre-test and post-test, purpose-based and accessible sampling, non-blind, randomized

Settings and conduct

Sessions were conducted at two urban tissue and spice health centers using data projector and discussion.

Participants/Inclusion and exclusion criteria

Experience at least one kind of self-abuse, no physical, psychological or cognitive problem

Intervention groups

Holding 5 60-minute sessions of abuse education towards the elderly based on the structures of the BASNEF model for an active member in the care of the elderly in the intervention group. The control group did not receive intervention.

Main outcome variables

BASNEF Model Structures; Abuse of the Elderly in the Family

General information

Reason for update

Acronym

basnef

IRCT registration information

IRCT registration number: **IRCT20170223032742N1**

Registration date: **2018-03-11, 1396/12/20**

Registration timing: **retrospective**

Last update: **2018-03-11, 1396/12/20**

Update count: **0**

Scientific title

The effect of education based on the BASNEF model on abuse of the elderly in the family

Public title

bbasnef model and abuse towards the elderly

Purpose

Education/Guidance

Inclusion/Exclusion criteria

Inclusion criteria:

Seniors Experiencing domestic Abuse

Exclusion criteria:

No cognitive problem

Age

From **60 years** old

Gender

Both

Phase

N/A

Groups that have been masked

No information

Sample size

Target sample size: **90**

Actual sample size reached: **90**

Randomization (investigator's opinion)

Randomized

Randomization description

simple

Blinding (investigator's opinion)

Not blinded

Blinding description

Placebo

Not used

Assignment

Other

Other design features

the elders divided to intervention and control group with simple randomization method (lottery)

Secondary Ids

empty

Health conditions studied

1

Description of health condition studied

Abuse of the elderly in the family

ICD-10 code

ICD-10 code description

Primary outcomes

1

Description

Abuse of the elderly in the family

Timepoint

Before the intervention and one month after the intervention

Method of measurement

Questionnaire on abuse of the elderly in the family

2

Description

Attitude, Belief, subjective norms, and Enabling Factors

Timepoint

Before intervention and one month after intervention

Method of measurement

Researcher-made questionnaire by BASNEF

Secondary outcomes

empty

Intervention groups

1

Description

Intervention group: 5 sessions of 60-minute training on abuse of the elderly in the family based on the structures of the BASNEF model (belief, attitude, SUBJECTIVE norms, enabling factors) for an active member of the elderly or abusive person's care. In order to influence the attitude and belief in the educational sessions, the clips of abuse of the elderly were broadcast at the meetings. To influence the abstract softness, the softwares that were willing to attend the training sessions were invited. In order to influence the factors contributing to the information was provided to people and social worker at the last session and seniors were introduced to the conditions well-being.

Title and more details about the data/document

Information on the main outcome can be shared, such as the dimensions of abusive behavior towards the elderly in the family, and the effect of education on the basis of the structures of the BASNEF model.

When the data will become available and for how long

Six months after printing results

To whom data/document is available

Researchers at the universities of medical sciences of the country

Under which criteria data/document could be used

Use descriptive statistics analysis

From where data/document is obtainable

Via email and contact number mortazavindr2@mums.ac.ir
