

Clinical Trial Protocol

Iranian Registry of Clinical Trials

15 Jul 2026

The effect of meditation on anxiety and pain of non-emergency patients of renal crusher candidate

Protocol summary

Study aim

Determination and comparison of anxiety in non-pregnant patients of renal stone crusher in intervention and control groups before and after intervention.
Determination of pain in non-pregnant patients of renal crusher candidate in intervention and control groups before and after intervention.

Design

Clinical trials with control group, community based and pragmatic, with parallel groups; double blind, randomized design.

Settings and conduct

Considering the effectiveness of meditation intervention in improving the anxiety and pain of patients with renal stone crusher. The researcher attended the Shahid Beheshti Hospital in Yasuj, Iran. At first, by introducing and expressing the research goals and obtaining a written informed consent from patients who entered the research, anxiety inventory was completed in the presence of the researcher. All eligible patients were admitted to the study, Nurse received meditation meditation training, but the control group did not receive any training.

Participants/Inclusion and exclusion criteria

Inclusion criteria: inclination to participate in research; kidney stones based on expert diagnosis; obtain more than 25 Hamilton anxiety inventory questionnaires.
Exclusion criteria: not participating in the study; participate in similar interventions; non-attending mediation therapy sessions; acute infection; children.

Intervention groups

A researcher at the Shahid Beheshti Hospital in Yasuj participated in all of the interventions. Firstly, with the introduction of the research goals and the written informed consent of the patients who entered the research, anxiety inventory was completed in the presence of the researcher. All patients qualified to enter the study, nurse received meditation meditation training, but the control group did not receive any training.

Main outcome variables

Fan meditation, anxiety, pain, candidates, kidney crusher.

Scientific title
The effect of meditation on anxiety and pain of non-emergency patients of renal crusher candidate

Public title
The effect of meditation on anxiety and pain of patients who perform kidney stone

Purpose
Health service research

Inclusion/Exclusion criteria
Inclusion criteria:
 Inclination to participate in research Kidney stones are diagnosed on the basis of a specialist diagnosis Earn more than 25 Hamilton anxiety inventory scores
Exclusion criteria:
 Unwilling to participate in the study Participate in similar interventions Not attending meditation therapy sessions Acute infection Children

Age
From **15 years** old to **70 years** old

Gender
Both

Phase
N/A

Groups that have been masked

Health conditions studied

1

Description of health condition studied

Patients Candidate Kidney Crusher

ICD-10 code

ICD-10 code description

Renal stone

Primary outcomes

1

Description

Pain and anxiety

Timepoint

Before intervention, after intervention

Method of measurement

Anxiety Inventory and Visual Analog Scale

2

Description

Reduce pain and anxiety

Timepoint

Before intervention, 2 hours after intervention

Method of measurement

Hamilton anxiety inventory, pain intensity scale NRS

Secondary outcomes

1

Description

Timepoint

Method of measurement

Intervention groups

1

Description

Intervention group: perform meditation medication on patients with renal stone crusher according to entry criteria in 20 minutes in 1 session

Category

Behavior

2

Description

Control group: This group does not receive intervention.

Title and more details about the data/document

It is possible to share some of the data, such as information on the main consequence.

When the data will become available and for how long

Available after 6 months of printing results.

To whom data/document is available

Research data will be available to researchers working in academic and scientific institutions.

Under which criteria data/document could be used

Use of data and documentation to conduct further research and access to more complete results is permissible.

From where data/document is obtainable

You can contact us by e-mail

What processes are involved for a request to access data/document

Request to receive data or documentation by email. As soon as possible, access to the requested files is available.
