

Clinical Trial Protocol

Iranian Registry of Clinical Trials

17 Sep 2026

Evaluation of apnea, hypopnea index changes and obstructive sleep apnea correction after bone graft in alveolar cleft patients.

Protocol summary

Study aim

Determination of apnea, hypopnea index changes and obstructive sleep apnea correction after bone graft in alveolar cleft patients.

Design

This study will be performed as a double blinded quasi experimental. This is a before-after interventional pilot research which would be executed on 10 alveolar cleft patients for evaluation of apnea/hypopnea index by Apnea-link device. The person who would collect the data and also who investigate them are blind.

Settings and conduct

Oral and maxillofacial surgery department of Ghaem hospital.

Participants/Inclusion and exclusion criteria

Inclusion criteria: All of the patients with unilateral alveolar cleft with age range 8-15 years old who would be candidate for bone graft; BMI less than 30 kg/m²; Without congenital syndromes; Without the history of cardiovascular or respiratory diseases like rhinitis, asthma, bronchitis. Exclusion criteria: Patients who would not attend for follow up; graft failure (due to exposure or infection)

Intervention groups

Intervention group: bone graft for alveolar cleft treatment group. No control group is available in this study.

Main outcome variables

Apnea/hypopnea index value; postoperative obstructive sleep apnea recovery

Scientific title

Evaluation of apnea, hypopnea index changes and obstructive sleep apnea correction after bone graft in alveolar cleft patients.

Public title

Evaluation of obstructive sleep apnea correction after bone graft in alveolar cleft patients.

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria:
All of the patients with unilateral alveolar cleft with age range 8-15 years old who would be candidate for bone graft. BMI less than 30 kg/m2 ASA 1,2 Without congenital syndromes Without history of cardiovascular or respiratory diseases like rhinitis, asthma , bronchitis.

Exclusion criteria:
Graft failure (due to exposure or infection) Patients who would not attend for follow up.

Age
From **8 years** old to **15 years** old

Gender
Both

Phase
N/A

Groups that have been masked

- Investigator
- Data analyser

Sample size
Target sample size: **10**

Randomization (investigator's opinion)
N/A

Randomization description

Blinding (investigator's opinion)
Double blinded

Blinding description
Person who would be responsible for data collection and also principle investigator and analysor are blind.

Placebo
Not used

Assignment
Single

Other design features
This study will be a quasi-experimental and pilot before-after interventional research.

G47.3

ICD-10 code description

Sleep apnea

2

Description of health condition studied

Alveolar cleft

ICD-10 code

Q37

ICD-10 code description

Cleft palate with cleft lip

Primary outcomes

1

Description

Apnea & Hypopnea index value.

Timepoint

1 week before surgery and 1 month postoperatively.

Method of measurement

Apnea link device measurement.

2

Description

Sleep apnea recovery.

Timepoint

1 week before surgery and 1 month postoperatively.

Method of measurement

Apnea link device measurement and questionare.

Secondary outcomes

1

Description

Sleep quality recovery.

Timepoint

1 week before surgery and 1 month postoperatively.

Method of measurement

Sleep questionnare.

Intervention groups

1

Description

Bone graft for alveolar cleft

Category

Treatment - Surgery

2

Description

No control group.

Category

N/A

Title and more details about the data/document

All collected unidentifiable data would be shared for all researchers.

When the data will become available and for how long

The access to data will be started 6 months after publication.

To whom data/document is available

The data would only be available for people working in academic institutions.

Under which criteria data/document could be used

It is allowed to use the data for meta-analysis and systematic reviews.

From where data/document is obtainable

The data can be obtained via email, from the corresponding researches (Dr Sahand samiee rad). E-mail: samieerads@mums.ac.ir

What processes are involved for a request to access data/document

The new research proposal and the processes details should be e-mailed to corresponding researcher in order to get the access permission.
