Comparison of anti-inflammatory effect of anaheal 500 (Bomelain 500) and ibuprofen 400 in mandibular third molar surgery

Protocol summary

Study aim

Anti-inflammatory effect of anaheal 500 in mandibular third molar surgery Determination of the effect of Anaheal on pain, trismus, ecchymosis after surgery Comparison of each of the above variables in the groups of Anaheal and Ibuprofen 400 after surgery Incidence of dry socket in all groups

Design

non-Randomised, superiority, parallel group trial with double blinded outcome assessment.

Settings and conduct

The place of the study is dental clinic of Babol University of Medical Sciences, where the patients and the main investigators are blinded by the envelopes of medicines by the pharmacist.

Participants/Inclusion and exclusion criteria

The population under study are those who refer to the clinic of the Faculty of Dentistry of Babol University of Medical Sciences in order to surgical removal of mandibular third molar. The number of samples based on similar studies, are 50 patients aged between 15 to 25 years old and candidates for mandibular third molar surgery. Patients are divided into two groups of recipients of Anaheal (Bromelain) and an ibuprofen 400 receptor. Non-admission criteria for our study include an adverse drug reaction to an anaheal or ibuprofen 400, smoking, taking some medications such as corticosteroids and bisphosphonates, diseases like diabetes, anemia, or other immunosuppressive diseases, hemorrhagic diseases, or the use of anticoagulant drugs, contraindication for adrenal use, pregnancy, radiotherapy in the head and neck, and also the presence of pericoronitis or any pathological lesions associated with third molar teeth. The impacted wisdom teeth are classified according to Pell & Gregory Classes I, II-A, B and Class III and C are excluded.

Intervention groups

Patients are divided into two groups of recipients of Anaheal (Bromelain) and ibuprofen 400 receptor, size of each group is 25.

Main outcome variables

Replacing Ibuprofen 400 with Anaheal After Surgery

Inclusion/Exclusion criteria

Inclusion criteria:

The population under study are peoples who refer to the clinic of the Faculty of Dentistry of Babol University of Medical Sciences in order to surgical removal of mandibular third molar. The impacted wisdom teeth are classified according to Pell & Gregory Classes I, II-A, B. Impacted teeth need to remove bones for better access to the crown of the tooth

Exclusion criteria:

Undesirable reaction to anaheal 500 or ibuprofen 400 smoking Taking some medicines like corticosteroids and basophosphonates Diseases like diabetes, anemia, or other immunosuppressive illnesses, hemorrhagic disease or taking anticoagulants Contraindication of adrenaline intake pregnancy History of radiotherapy in the head and neck area no paricoronitis or any pathological lesions associated with third molar teeth Classes III and C of The pell & gregory classes are excluded
