The effect of oral Chromium picolinate supplementation on Liver Function, Oxidative Indicators, Leptin, Resisten, lipid profile, Blood Glucose Control Indicators, serum levels of Fetuin A and inflammatory factors in Non-Alcoholic Fatty Liver

Protocol summary

Study aim

Determine the effect of oral Chromium picolinate supplementation on Liver Function, Oxidative Indicators, Leptin, Resisten, lipid profile, Blood Glucose Control Indicators, serum levels of Fetuin A and inflammatory factors in Non-Alcoholic Fatty Liver (NAFLD)

Design

In this study, the target population will be people with NAFLD who were diagnosed and introduced by a gastroenterologist and ultrasound specialists and entered the study according to the criteria for entering the study and after obtaining written consent, randomly divided into two control and intervention groups.

Settings and conduct

This double-blind study is conducted at the Faculty of Nutrition Sciences of Tabriz University of Medical Sciences

Participants/Inclusion and exclusion criteria

Patients with NAFLD and lack of non-compliance characteristics

Intervention groups

Group intervention group receiving chromium picolinate and control group of starch corn.

Main outcome variables

Body mass index (BMI); age; duration of disease; history of drug use; diet; psychological stress; physical activity; Total cholesterol (TC); Triglyceride (TG); low density lipoprotein (LDL); High density lipoprotein (HDL); Plasma Atherosclerosis; Haemoglobin A1c (HbA1c) ; Insulin serum concentration; Fasting blood glucose; Insulin resistance index; Fetuin A; Tumour necrosis factor- α (TNF- α); High-sensitivity C-reactive protein (Hs-CRP); Interleukin 17 (IL-17); Alanine Aminotransferase (ALT); Aspartate Aminotransferase (AST); Alkaline Phosphatase (ALP) ; Superoxide Dismutase (SOD); Malondialdehyde (MDA); Glutathione Peroxidase (GPX); leptin; Resistin

Scientific title
The effect of oral Chromium picolinate supplementation on Liver Function, Oxidative Indicators, Leptin, Resisten, lipid profile, Blood Glucose Control Indicators, serum levels of Fetuin A and inflammatory factors in Non-Alcoholic Fatty Liver

Public title
The effect of Chromium picolinate in Non-Alcoholic Fatty Liver

Purpose
Treatment

Inclusion/Exclusion criteria

Inclusion criteria:
Patients who agree to participate in the study Men and women aged 20 to 50 years BMI ranges from 25 to 40 kg / m² Increased levels of ALT and AST are higher than normal levels Grade 2, 3, and 4 diseases

Exclusion criteria:
kidney disease Thyroid gland problems Uncontrolled blood pressure Taking statin Hepatitis C and B Cytomegalovirus Pregnancy alcohol consumption Wilson Hcromatosis Deficiency of alpha-1 antitrypsin

Age
From **20 years** old to **50 years** old

Gender
Both

Phase
2-3

Groups that have been masked

- Participant
- Investigator

Sample size
Target sample size: **46**

Randomization (investigator's opinion)
Randomized

Randomization description
Samples were randomly assigned to either one of the two groups of chromium picolinate or placebo using RAS software.

Blinding (investigator's opinion)
Double blinded

Blinding description
Patients are assigned codes and randomly divided into placebo and intervention groups. Both patients and us will not be aware of which patients will take placebo or supplement

Placebo
Used

Assignment
Parallel

Other design features

Health conditions studied

1

Description of health condition studied

Non-alcoholic fatty liver

ICD-10 code

K76.0

ICD-10 code description

Fatty (change of) liver, not elsewhere classified

Primary outcomes

1

Description

LDL

Timepoint

First and three months after the start of the study

Method of measurement

Enzyme colorimetry

2

Description

HDL

Timepoint

First and three months after the start of the study

Method of measurement

Enzyme colorimetry

3

Description

TNF- α

Timepoint

First and three months after the start of the study

Method of measurement

ELISA Kit

Secondary outcomes

1

Description

Plasma Atherogen Index

Timepoint

Study beginning and 90 days after the start

Method of measurement

Triglyceride logarithmic formulation divided by high density lipoprotein

2

Description

BMI

Timepoint

First and six weeks after study

Method of measurement

Weight divided by second power of height

3

Description

Dietary intakes

Timepoint

First and 6 weeks after the start

Method of measurement

24-hour dietary recall inventory questionnaire

4

Description

Psychological stress

Timepoint

First and six weeks after the start of the study

Method of measurement

Holmes-and rahe scales questionnaire

5

Description

Insulin resistance index

Timepoint

First and three months after the study

Method of measurement

Calculate Homeostatic model assessment

6

Description

The amount of physical activity

Timepoint

First and 6 weeks after study

Method of measurement

The International Physical Activity Questionnaire

7

Description

Waist circumference

Timepoint

First and Sixth Week

Method of measurement

measurement

8

Description

Boddy fat mass

Timepoint

First and Sixth Week

Method of measurement

Bioelectrical impedance analysis

9

Description

blood pressure

Timepoint

Frist and sixth week

Method of measurement

Digital monometer

10

Description

Chromium levels of blood

Timepoint

First and 3 months later study

Method of measurement

Spectrophotometry

11

Description

SOD

26

Description
Fasting blood sugar
Timepoint
First and three months after the start of the study
Method of measurement

Enzyme colorimetry

Intervention groups

1

Description

patients with NAFLD receiving 2 tablets of 200 microgram of chromium picolinate per day for 3 months. Delivery of medication to patients will be done every two weeks and it will be monitored during use by the phone for possible complications and continued use.

Category

Treatment - Other

2

Description

Control group:Patients with NAFLD who receive a placebo of corn starch tablets for two days each day for 3 months. Placebo will be delivered to patients every two weeks and will be monitored by the phone for potential side effects and continued use during use.
