

Clinical Trial Protocol

Iranian Registry of Clinical Trials

28 Jun 2026

Investigation the effect of self-awareness skill training to head of the family mothers , on self-efficacy of 10-12 year old boys

Protocol summary

Registration timing: **retrospective**

Study aim

Determining and comparing the self-awareness of the head of the family mothers and self-efficacy of their boys before and after intervention in the experimental and control groups

Last update: **2018-07-19, 1397/04/28**

Update count: **0**

Registration date

2018-07-19, 1397/04/28

Design

Controlled clinical trial, with parallel groups, non-random

Registrant information

Name

Malihe Azizinezhad

Settings and conduct

After obtaining the consent of the research samples, the questionnaire is given to them and will be collected after completion. The study program and the address of the educational site, which is one of the schools under study in Shahre-Rey (south of Tehran), will be informed to the test group. Then, the self-awareness skill will be taught to mothers of the test group in Ghalanbor martyr primary school by the researcher.

Health conditions studied

1

Description of health condition studied

level of head of family mothers' self-awareness and their boys' self-efficacy

ICD-10 code

ICD-10 code description

Primary outcomes

1

Description

Self-efficacy score

Timepoint

Before the intervention and three months after the intervention

Method of measurement

Muris Self-Efficacy Questionnaire

Secondary outcomes

1

Description

Self-awareness score

Timepoint

Before the intervention and three months after the end of the training intervention

Method of measurement

Fenigstein et al. Self-consciousness scale

Intervention groups

1

Description

The intervention group program will consist of four 45-minutes sessions, in group and twice a week. Educational content is developed using books and research articles and validated by several faculty members of nursing school and then taught. The titles of each session will be as follows: Session 1: Introduction, description of the rules of participation in the training sessions and goals, the definition and familiarity with the self-awareness skill, types of concept. Title and more details about the data/document

The demographic and individual information of all participants in the research after unidentified sharing is possible.

When the data will become available and for how long

Access to data is available six months after the publication of the article.

To whom data/document is available

Researchers at universities have access to the individual data of the participants.

Under which criteria data/document could be used

Statistical data will only be allowed to cite in the articles and research that is in line with this study.

From where data/document is obtainable

To receive the data after receiving the letter of introduction from the university with the researcher's email address listed below: azizinejad.m@tak.iums.ac.ir

What processes are involved for a request to access data/document

After obtaining a letter of introduction from the university, the applicant will send a letter to the researcher, After two to three weeks, the data will be available to them.
