Cordia Myxa on prevention the effect of mouthwashes fruits of stomatitis (mouth sores) in patients receiving chemotherapy

Protocol summary

Study aim

Cordia Myxa on prevention the effect of mouthwashes fruits of stomatitis (mouth sores) in patients receiving chemotherapy

Design

randomized, double-blind, controlled clinical trial

Settings and conduct

Then the researcher attended in the hematology wards of Shafa And Baghai2 Hospitals and informed writing consent was obtained from patients who were willing to participate in the study. Patients were admitted to the hospital one day before chemotherapy

Participants/Inclusion and exclusion criteria

Patients undergoing chemotherapy in the oncology departments of Shafa and Baghaee 2 Hospitals/Inclusion criteria:Age over 18 years, Acute leukemia under periodic chemotherapy in the induction and intensification phases,Complete alertness-Exclusion criteria:Asthma, allergies, and other sensitivity diseases, Simultaneous chemotherapy and radiotherapy, Development of a systemic infection during the study

Intervention groups

After which, correct use of mouthwash was taught, so that the mouth was washed for one minute with 30 drops of 5% formulation of lasura (Cordia myxa) fruit mucilage poured in 20 mL water; then the mouthwash was spat out, followed by not eating for up to 1 hour. After training, the treatment and the control groups were given lasura mouthwash and sterile water (with the same flavor and taste), respectively, in a glass that has a dropper.

Main outcome variables

Cordia Myxa: prevention: stomatitis: chemotherapy

Scientific title

Cordia Myxa on prevention the effect of mouthwashes fruits of stomatitis (mouth sores) in patients receiving chemotherapy

Public title

Cordia Myxa on prevention the effect of mouthwashes fruits of stomatitis (mouth sores) in patients receiving chemotherapy

Purpose
Prevention

Inclusion/Exclusion criteria
Inclusion criteria:
 Age over 18 years Acute leukemia under periodic chemotherapy in the induction and intensification phases
 Complete alertness
Exclusion criteria:
 Asthma, allergies, and other sensitivity diseases
 Simultaneous chemotherapy and radiotherapy
 Development of a systemic infection during the study.

Age
From **18 years** old to **70 years** old

Gender
Both

Phase
N/A

Groups that have been masked

- Participant
- Investigator

Sample size
Target sample size: **60**

Randomization (investigator's opinion)
Not randomized

Randomization description

Blinding (investigator's opinion)
Double blinded

Blinding description
Cordia Myxa mouthwash and mouthwash after the approval of the pharmacist and an expert oncology participant in the research were coded without the knowledge of the researcher. After obtaining a license from the University's Ethics Committee and explaining to patients undergoing chemotherapy, they were placed in one of the two intervention and placebo groups. And received one of two types of mouthwash.

Placebo
Used

Assignment
Single

Other design features
The present randomized, double-blind, controlled clinical trial

Health conditions studied

1

Description of health condition studied

Osteomathite

ICD-10 code

D80-D89

ICD-10 code description

III Diseases of the blood and blood-forming organs and certain disorders involving the immune mechanism

Primary outcomes

1

Description

The amount of osteomyte is taken from the WHO standard checklist of osteomathite.

Timepoint

(Before the intervention) , 7 and 14

Method of measurement

The WHO stomatitis checklist, validity and reliability of this checklist has been confirmed.

Secondary outcomes

empty

Intervention groups

1

Description

Intervention group: Intervention group: On the same day, demographic information of both two groups was recorded and their mouths were examined. Soft toothbrushes were provided to the groups, and correct brushing was taught to them and was exercised, after which, correct use of mouthwash was taught, so that the mouth was washed for one minute with 30 dropsof 5% formulation of lasura (Cordia myxa) fruit mucilage poured in 20 mL water; then the mouthwash was spat out, followed by not eating for up to 1 hour. After training, the treatment.
