Comparison of electroacupuncture and low level laser on treatment of frozen shoulder

Protocol summary

Summary

The aim of this research is comparing the effect of electroacupuncture and low-level laser on the treatment of frozen shoulder. This study is a double-blind clinical trial because both of patient and assessor are not aware of the kind of treatment methods but the therapist is aware of the treatment methods. Seventy-five patients will refer to the Fattemieh physiotherapy clinic in Rafsanjan. Assessor evaluates the patients based on inclusion criteria, then he divides them to random permuted blocks methods in 3 equal groups and refers to the therapist. Three interventions of this study are electroacupuncture (acupuncture with electricity), low-level laser (Gallium, Aluminum-Arsenide, 810nm, 100mv) and conventional therapy (Ultrasound, Infrared, Transcutaneous Electrical Nerve Stimulation (TENS)). The intensity of pain and movements will be assessed during 1st, 5th, 10th sessions and one month later. Inclusion criteria are having 45-65 years; having limitation of flexing, abduction, lateral and medial rotation of the shoulder movements; pain in active and resistive movements; time of affected to shoulder pain has been previous 3 months; frozen shoulder should be primary kind. Exclusion criteria are having previous surgery and fracture; corticosteroid injection and physiotherapy during 6 months ago; rupture of the rotator cuff; pregnancy and secondary frozen shoulder.

Health conditions studied

1

Description of health condition studied

Frozen shoulder

ICD-10 code

M75.0

ICD-10 code description

Adhesive capsulitis of shoulder

Primary outcomes

1

Description

Pain intensity

Timepoint

1st, 5th, 10th sessions and one month later

Method of measurement

By Visual Analogue Scale (VAS)

2

Description

Shoulder movements

Timepoint

1st, 5th, 10th sessions and one month later

Method of measurement

By goniometer

Secondary outcomes

empty

Intervention groups

1

Description

First group will receive electroacupuncture. Needle is inserted to acupuncture points of shoulder, then electrical stimulation through simulator set connect to patients body, Ying Di, KWD 808 model, made in china, 3HZ and 20 minutes.

Category

Rehabilitation

2

Description

Second group will receive low level laser (Ga Al AS, 810 nm, 100 mv) 6J intensity and 10 minutes per session during 10 session on 9 acupuncture points of the frozen shoulder.

Category

Rehabilitation

3

Description

Third group (conventional physiotherapy) are include Ultrasound, Infrared and TENS sets.
