

Clinical Trial Protocol

Iranian Registry of Clinical Trials

22 Jun 2026

The effectiveness of storytelling targeted by the value of life (responsibility - Respect) and moral judgment schoolchildren

Protocol summary

Study aim

Determination of effectiveness of storytelling targeted by the value of life (responsibility - Respect) and moral judgment schoolchildren

Design

Before the intervention, both groups completed the test and control questionnaires. The experimental group consisted of 8 sessions of 45 minutes, under the direction of storytelling, but the control group did not receive.

Settings and conduct

After intervention in the primary school, both the control and experimental groups responded to the questionnaires.

Participants/Inclusion and exclusion criteria

Entry requirements included the age range of 9-11, the lack of simultaneous use of educational interventions and full satisfaction for participation in research and exit conditions, including the lack of interest of parents to their child's company in research and absence more than 2 sessions in intervention periods

Intervention groups

A experimental group includes 15 primary school children who will be targeted by storytelling intervention
A control group consisting of 15 primary school children who would not be targeted by storytelling intervention

Main outcome variables

Values of Life and Ethical Judgment
