Health conditions studied

1

Description of health condition studied

Types of sexual and sexual function and the effect of counseling type consistent with self-determination theory on the type of sexual stimulation and sexual function

ICD-10 code

F52.9

ICD-10 code description

Unspecified sexual dysfunction not due to a substance or known physiological condition

Primary outcomes

1

Description

Type of motivation and sexual function

Timepoint

At the beginning of the study

Method of measurement

The score obtained from the questionnaire

Secondary outcomes

1

Description

Change the type of sexual Motivation

Timepoint

One month after the intervention

Method of measurement

The score obtained from the questionnaire

2

Description

Upgrading sexual function

Timepoint

One month after the intervention

Method of measurement

The score obtained from the questionnaire

Intervention groups

1

Description

Control group: Receive routine care and do not interfere. The group completes the "Theory Structural Questionnaire, the type of sexual motivation, and Sexual Functioning of FSFI Women" at the beginning and one

month later.

Category

Behavior
