Study of Morus nigra L. on HbA1c in diabetic patient

Protocol summary

Summary

This is a one-stage and triple blind clinical trials with controls. All patients with type2 diabetes who referred to clinic of Imam Khomeini hospital in Khomeini city, after examination by a physician as having diabetes if they consent to participate in research are imported. Samples for this study consisted of 100 patients with type II diabetes who selected with convenience sampling method and with simple randomly selected using random numbers table placed in two groups of 50 people. In case group, 3 milliliters of alcoholic extract of leaves of Morus Nigra L. in a glass of water three times a day are given for 3 months. In the control group for 3 months placebo (Alcohol does mulberry leaf extract of Morus Nigra L.) are given. Baseline hemoglobin A1C test result during the three months and then evaluated by the laboratory to be analyzed together. In this study, two sample thief (Mrs.) Fix trained and justified in the study. The data collection instrument consisted is a questionnaire and hemoglobin A1C test. The questionnaire consisted of 21 questions that included demographic information and questions about physical activity patterns, daily physical activity, family history of diabetes and hemoglobin A1C test result was the first step. In the second stage and after 3 months of intervention hemoglobin A1C obtained and the result is recorded. The sample-thief in this research do not know the contents of the medicine. Also, patients are not aware of what medications; Statistician also deals with the raw data, so it is triple-blind study.

Scientific title

Study of Morus nigra L. on HbA1c in diabetic patient

Public title

effect of Morus nigra L. on diabetic

Purpose

Treatment

Inclusion/Exclusion criteria

inclusion criteria included: Patients over 18 years; Type II diabetes for at least a year; Patients with blood levels of glycosylated hemoglobin of 7 to 9%; Recourse to the diabetes clinic in Khomeini city; consent to participate in

research Exclusion criteria included: Pregnant women or those who are trying to conceive; lactating women; patients with physical and mental disorders; Patients who use herbal medicines, nearly as continuous doesn't; Patients who have a special diet; Patients who use drugs addressing specific; diabetics insulin consume; patients younger than 18 years; having severe stress in the past 8 weeks; allergic to herbal medicines; Patients who have a need to change the amount of medicine; Patients who need to change their weight; Patients who need to change the quality of life.
