

Clinical Trial Protocol

Iranian Registry of Clinical Trials

28 Sep 2026

the comparison of two old and new methods of teaching on learning and knowledge of midwifery students about breast cancer and its screening

Protocol summary

Study aim

Comparison of two multimedia teaching methods (multimedia) and lecture method on learning and knowledge sustainability in women's disease unit

Design

clinical trial with control group, randomized

Settings and conduct

school of Nursing, Shiraz University of Medical Sciences

Participants/Inclusion and exclusion criteria

The criteria for entering samples were to study the unit of women's diseases during the period of study at Shiraz University of Medical Sciences. The criteria for leaving the samples were from a guest attendance or transfer from a medical university of the country to Shiraz University of Medical Sciences.

Intervention groups

The group was taught by lecture methodology and other groups using multimedia breast cancer topics and screening methods.

Main outcome variables

Knowledge of students before and after intervention, knowledge sustainability in students after intervention
