The Effect of Chlorella Vulgaris Supplementation on Oxidative Stress and Inflammatory Indices on Non-Alcoholic Fatty Liver Disease (NAFLD) Patients

Protocol summary

Summary

This randomized double blind placebo controlled trial design with aim to determine the effect of chlorella vulgaris supplementation on oxidative stress and inflammatory indices on non-alcoholic fatty liver disease (NAFLD) patients. 70 patients with NAFLD will be randomly divided into 2 intervention and placebo groups. Subjects in two intervention and placebo group will receive 4 tablets of chlorella vulgaris daily (each containing 300 mg, daily 1200 mg) or 4 tablets of placebo respectively for two month. For all of the participants, personality questionnaire and 3 dietary records (0,4.8 weeks) will be filled for assessment of nutrient intake and food frequency questionnaire for food habit evaluation. The anthropometric and biochemical measurements at first and end of the study will be repeated.

Scientific title

The Effect of Chlorella Vulgaris Supplementation on Oxidative Stress and Inflammatory Indices on Non-Alcoholic Fatty Liver Disease (NAFLD) Patients

Public title

The Effect of Chlorella Vulgaris Supplementation on Oxidative Stress and Inflammatory Indices on Non-Alcoholic Fatty Liver Disease (NAFLD) Patients

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria: Liver steatosis on sonographic image; 20-50 years old; BMI>=30; moderately activity.
Exclusion criteria: Alcohol intake more than 20g/d; gestation or lactation or Menopause; very active or

inpatients; Cardiovascular disease; Pulmonary disease; renal disease; liver transplantation; other liver diseases and chronic or acute liver disease(Hepatitis A,B, ...); bilious impairments; cancers; inheritance diseases; using drugs like, insulin sensitivity enhancer, hepatotoxic drugs and estrogen.

Health conditions studied

1

Description of health condition studied
non- alcoholic fatty liver disease

ICD-10 code
K76.0

ICD-10 code description
Fatty (change of) liver, not elsewhere classified

Primary outcomes

1

Description
Oxidative Stress Indicies

Timepoint
Beginning and end of the intervention

Method of measurement
TAC and ARE spectrophotometry, SOD and Gpx by Spectrometry and MDA thiobarbituric acid

2

Description
Inflammatory Indicies

Timepoint
Beginning and end of the intervention

Method of measurement
TNF-α and hs-CRP measurement with special kits

3

Description
Liver Enzyme (ALT,AST,ALP)

Timepoint
Beginning and end of the intervention

Method of measurement
IFCC

4

Description
Liver steatosis

Timepoint
Beginning and end of the intervention

Method of measurement
Liver Sonography

Secondary outcomes

1

Description
anthropometry

Timepoint
Begining and end of intervention

Method of measurement
Scale and meter

2

Description
Energy and nutrient intake

Timepoint
beginning, fourth week and end of the intervention

Method of measurement
Dietary record and food frequency questionnaire

Intervention groups

1

Description
Intervention Group: 300 mg chlorella vulgaris, 4 tablets/day for 8 weeks
Category
Treatment - Drugs

2

Description
Placebo groups: placebo, 4 tablets/day for 8 weeks
Category
Placebo
