### Comparison the efficacy of pumpkin seed oil and amygdalous scorparia herbal tea in treatment of benign prostate hyperplasia in patients older than 45 years old

#### Protocol summary

##### Study aim

Comparing the efficacy of amygdalous scorparia herbal tea and pumpkin seed oil in treatment of symptoms of benign prostatic hyperplasia (BPH).

##### Design

In this randomized clinical trial with parallel control group , eighty patients older than 45 years suffering from benign prostate hyperplasia with sequential randomized allocation method by help of sealed envelope will assigned in one of two groups (pumpkin seed , amygdalous scorparia) and will received related intervention for one month.

##### Settings and conduct

Patients referring to Shahid Mofateh clinic of Yasuj suffering from benign prostatic hyperplasia candidate for medical treatment with sequential randomization method allocated in one of two groups. The history and physical exam and basic serum samples will be checked. In two groups standard treatment will be done by tamsulosin .One months later, the patients will re-examined and the success of treatment measured and recorded according to improvement of symptoms and International Prostatic Symptom Score of patients.

##### Participants/Inclusion and exclusion criteria

Inclusion criteria: Men older than 45 years old with benign prostatic hyperplasia with International Prostatic Symptom Score less than 20, Exclusion criteria: Men suffering from benign prostate hyperplasia with azotemia, active urinary tract infection and patients with history of herbal or medical allergy

##### Intervention groups

Intervention group: every 12 hours, the herbal tea of amygdalous scorparia, along with a glass of water plus 0.4 milligram of tamsulosin capsule every night will prescribe for one month. Control group: every 12 hours 20 drops of pumpkin seeds oil produced by Zardband company, along with a glass of water plus 0.4 milligram

of tamsulosin capsule will prescribed for one month.

##### Main outcome variables

Improvement symptoms of benign prostatic hyperplasia according to the International Prostatic Symptom Score criteria

**Scientific title**

Comparison the efficacy of pumpkin seed oil and amygdalous scorparia herbal tea in treatment of benign prostate hyperplasia in patients older than 45 years old

**Public title**

Pumpkin seed oil and amygdalous scorparia in treatment of benign prostate hyperplasia

**Purpose**

Treatment

**Inclusion/Exclusion criteria****Inclusion criteria:**

Men older than 45 years old suffering from Benign Prostatic Hyperplasia (BPH) candidate for medical treatment International Prostatic Symptom Score (IPSS) less than 20

**Exclusion criteria:**

Men with benign prostatic hyperplasia with azotemia  
Patients with active urinary tract infection  
Patients with history of herbal or medical allergy

**Age**

From **45 years** old

**Gender**

Male

**Phase**

3

**Groups that have been masked**

*No information*

**Sample size**

Target sample size: **80**

**Randomization (investigator's opinion)**

Randomized

**Randomization description**

Patients are allocated randomly with simple sequential allocation in one of the two study groups by help of sealed envelope and receive the intervention of the same group. The unit of randomization will be the refereed patient. In every envelope, one of two codes (A=pumpkin seed oil) and or (B=amygdalous scorparia) will be taken. The sealed envelopes will be placed at the disposal of the expert. With the referral of each patient one of the envelopes will be randomly selected by the patients and will be introduced as a study group. The stratification approach is not used. Concealment will not take place in the study.

**Blinding (investigator's opinion)**

Not blinded

**Health conditions studied****1****Description of health condition studied**

Benign prostatic hyperplasia

**ICD-10 code**

N40

**ICD-10 code description**

Hyperplasia of prostate

**Primary outcomes****1****Description**

Improvement of obstructive and irritative symptoms of prostatic hyperplasia

**Timepoint**

At the start of study and one month later

**Method of measurement**

Using international prostatic symptom score

**Secondary outcomes**

empty

**Intervention groups****1****Description**

Intervention group: The amygdalous scorparia herbal tea with definite herbarium number will used ,along with a glass of water every 12 hours with 0.4 milligram of tamsulosin capsule every night for one month.

**Category**

Treatment - Drugs

**2****Description**

Control group: Twenty drops of pumpkin seeds oil every 12 hour with one glass of water plus 0.4 milligram of tamsulosin capsule will prescribed every night for 1 month
