Effectiveness of Educational Intervention Based on Roy's Adaptation model on the Psychosocial Adjustment of patients with Permanent Pacemaker

Protocol summary

Study aim

Determining the Effectiveness of Educational Intervention Based on ROY Adaptation Model on Psychosocial Adjustment of Patients with Permanent Pace maker Shahid Madani Hospital, Khorramabad, Iran.

Design

Semi-experimental clinical practice, without independent control group, before and after, sampling available, without blinding

Settings and conduct

A study on the Adaptation of Patients with Pace maker in the Khorramabad Madani Hospital. Patients will be selected with the introduction of the arrhythmia Doctor. On the first day, providing clear explanations about the purpose of the study and obtaining written consent and the next month when the patient is referred to the doctor for analysis of the battery, three forms are filled by the researcher. Within one week, the researcher will pay attention to the Roy model to analyze the information and the general and specific training program will be implemented for each person in the hospital, and immediately after the training, a compatibility questionnaire will be filled. A month and three months later, the compatibility questionnaire will be filled again

Participants/Inclusion and exclusion criteria

Log-in: Patients with Permanent Pacemaker in their body and One month after the pacemaker has been used in the patient's body and are pleased to participate in the study. Non arrival: 1- 1. Not having Patient's tendency to assist in research. 2.Un Favorable physical condition. 3. Participation in any kind of effective workshop on the level of compatibility 4. Using Drugs that are effective on your Mental health

Intervention groups

All Patients with Permanent Pacemakers referring to Khorramabad Madani Hospital in 1397form the community under study

Main outcome variables

Psychosocial compatibility

Scientific title

Effectiveness of Educational Intervention Based on Roy's Adaptation model on the Psychosocial Adjustment of patients with Permanent Pacemaker

Public title

Effectiveness of Educational Intervention Based on Roy's Adaptation model on the Psychosocial Adjustment of patients with Permanent Pacemaker

Purpose

Supportive

Inclusion/Exclusion criteria**Inclusion criteria:**

1. Patients who have Permanent Pace maker in their bodies . 2. One month after the pacemaker has been used in the patient's body. 3. the patient should express his consent to participate in the training program . 4. Patient should be introduced by the doctor to participate in the research 5. A person can understand Give the subject. 6. Age between 20-70 years 7. Lack of serious disabling illness, such as COPD - Blindness - Cancer . 8. Lack of any psychological problem 9. Lack of any hearing impairment - Vision - Speech 10. To Know Farsi language 11. Having a mobile or phone

Exclusion criteria:

1. Not having Patient's tendency to assist in research. 2. Unfavorable physical condition 3. Participating in any kind of effective workshop on the level of compatibility 4. Use of drugs that affect fluency

Psychosocial Adjustment

ICD-10 code**ICD-10 code description****Primary outcomes****1****Description**

Psychosocial Adjustment

Timepoint

The Demographic Characteristics and the form of examination and recognition on the first session and the Psychosocial Adjustment to Illness Scale immediately After the intervention, one month and three months later After the intervention, will be completed by questioning the patient through the researcher's assistance (four times the questionnaire will be completed).

Method of measurement

Including Demographic Specification Form - Standard Questionnaire on Knowledge of ROY - Psychosocial Adjustment to Illness Scale

Secondary outcomes**1****Description**

Compatibility time

Timepoint

Beginning of the study (before the intervention) - Immediately after the intervention - one month after the intervention - three months after the intervention

Method of measurement

Intervention groups

1

Description

Intervention group: Patients with Pacemakers. The intervention will be conducted in accordance with a training protocol prepared by the care team (Researcher Nurse, relevant Physician, and Psychologist). The theoretical and practical program with lecture notes and lectures, with the help of slides and short films, include: (teaching patients about: heart function, definition of an Arrhythmia, Pacemaker function and physical risk factors And non-physical with illness and Pacemaker - in Psychological problems such as depression - Anxiety - Disturbance in the body of mind - decentralization - isolation and ... also social problems such as job loss - communicating with family and others - Participating in communities - adapting to the social environment ...) in 4 training sessions of 40 minutes and during 2 weeks in the conference hall Shaheed Madani Hospital will be offered. Meanwhile, after the end of the sessions, they will be in constant contact with the patients once a month (for one month) and their questions will be answered about their situation.

Title and more details about the data/document

All participants' data are shareable in the study.

However, the outcomes of the study are more relevant

When the data will become available and for how long

Access is available 6 months after the results are published.

To whom data/document is available

Scientific and academic Nursing researchers from Medical Sciences have access to the documentation.

Under which criteria data/document could be used

Any Analysis is allowed by the Professor. Use for research and research in Nursing and Medical Sciences is allowed. The requirements for sending Nursing and Medical Science groups can be provided.

From where data/document is obtainable

Khorram Abad University of Medical Sciences - Boroujerd Road 4 - Pardis University Campus - Faculty of Nursing - Dr. Tahereh Toloabi Mailbox: 381351698 Telex: 33120140-066 E-mail: Tolabi.t@lums.ac.ir College Education: 33120155-066- 33120166-066 - Internal 403 and 403

What processes are involved for a request to access data/document

First, Contact by email with Dr. Tolabi office to get permission to access the next document if Dr. Tolabi's permission is granted. Documentation will be sent by him or by Elham Nassiri's student.

Comments

This Study is based on Nursing Models. It is widely used in studies that are supposed to work on patients based on Nursing Models or to work on adaptation in chronic patients.
