Target sample size: **100**

Randomization (investigator's opinion)
Randomized

Randomization description
In this study, a simple random method will be used. In this method, the intervention and control group is selected using the lottery between the Grand prophet's (PBUH) complex and the headquarters. Then, from among the staff of each center, using their list, a lottery will be drawn from the people who have entered the study and the samples of the intervention and control group are selected. The randomization unit in this method will be individualized.

Blinding (investigator's opinion)
Not blinded

Sharing plan

Deidentified Individual Participant Data Set (IPD)

No - There is not a plan to make this available

Justification/reason for indecision/not sharing IPD

If necessary, with the funding of the Arak University of Medical Sciences, will be presented after obtaining a license.

Study Protocol

Yes - There is a plan to make this available

Statistical Analysis Plan

Yes - There is a plan to make this available

Informed Consent Form

Yes - There is a plan to make this available

Clinical Study Report

Yes - There is a plan to make this available

Analytic Code

Yes - There is a plan to make this available

Data Dictionary

Yes - There is a plan to make this available

Title and more details about the data/document

The study protocol will be presented in the form of a file, and only part of the original outcome data can be shared.

When the data will become available and for how long

The start of the access period is six months after the publication of the results.

To whom data/document is available

Researchers at universities, can apply for them.

Under which criteria data/document could be used

To study and use as a guide.

From where data/document is obtainable

Contact the researcher by email:roozbahani7281@gmail.com

What processes are involved for a request to access data/document

Two weeks after the email is received by the researcher, the documentation file is sent to the applicant.
