

# Clinical Trial Protocol

## Iranian Registry of Clinical Trials

27 Jun 2026

### A clinical trial comparing the effects of cognitive-behavioral group training and lack of training on depression of nurses

#### Protocol summary

##### Study aim

To investigate the effect of cognitive-behavioral group training on the depression levels of nurses working in teaching hospitals of Birjand

##### Design

In this randomized controlled field trial, 40 eligible nurses from the teaching hospitals affiliated with Birjand University of Medical Sciences were included by convenience sampling method. First, the Beck Depression Inventory was completed by nurses and those with a score range from 13 to 32 on the inventory were included. Afterwards, the nurses were randomly assigned into the intervention (n=20) and control (n=20) groups.

##### Settings and conduct

As a non-blinded study, the trial was conducted at the nursing research center of Birjand University of Medical Sciences. At first, the participants completed Beck's Depression Inventory. The intervention group members received eight 1.5-hour sessions of cognitive-behavioral group training on coping with depression on a weekly basis. Nurses in the control group did not receive any interventions. After the 8th session and two months later, the members of both groups completed the inventory.

##### Participants/Inclusion and exclusion criteria

Inclusion criteria: Earning score 13 or above on the Beck Depression Inventory; working in one of the teaching hospitals affiliated to Birjand University of Medical Sciences for a minimum of one year; and informed consent to participate in the study. Exclusion criterion: Suffering from other mental and physical disorders.

##### Intervention groups

Intervention group (cognitive-behavioral): The intervention group members received eight 1.5-hour sessions of cognitive-behavioral group training on coping with depression on a weekly basis. Control group: They received no training.

##### Main outcome variables

depression

**Scientific title**

A clinical trial comparing the effects of cognitive-behavioral group training and lack of training on depression of nurses

**Public title**

Effect of cognitive-behavioral group training on depression

**Purpose**

Education/Guidance

**Inclusion/Exclusion criteria****Inclusion criteria:**

Earning the score of 13 or above on the Beck Depression Inventory Working in one of the teaching hospitals affiliated to Birjand University of Medical Sciences for a minimum of one year Informed consent to participate in the study Age range from 23 to 45 years Having bachelor's degree or higher

**Exclusion criteria:**

Having other mental and physical disorders

**Age**

From **23 years** old to **45 years** old

**Gender**

Both

**Phase**

N/A

**Groups that have been masked**

*No information*

**Sample size**

Target sample size: **80**

Actual sample size reached: **80**

**Randomization (investigator's opinion)**

Randomized

**Randomization description**

A total of 80 participants who met the inclusion criteria were incorporated using convenience sampling method. Each eligible participant was assigned a code. Using the table of random numbers, the participants were allocated to the intervention or control groups.

**Blinding (investigator's opinion)**

Not blinded

**Blinding description****Placebo**

Not used

**Assignment**

Parallel

**Other design features****Secondary Ids**

empty

**Approval date**

2017-04-19, 1396/01/30

**Ethics committee reference number**

IR.bums.REC.1396.21

**Health conditions studied****1****Description of health condition studied**

depression

**ICD-10 code**

f32.9

**ICD-10 code description**

Depressive episode, unspecified

**Primary outcomes****1****Description**

Depression

**Timepoint**

Before training, immediately after training, two months after training

**Method of measurement**

Beck Depression Inventory

**Secondary outcomes**

empty

**Intervention groups****1****Description**

Intervention group (cognitive-behavioral): The intervention group members received eight 1.5-hour sessions of cognitive-behavioral group training on coping with depression on a weekly basis. In brief, topics of the sessions included the nature of depression, cognitive model, cognitive errors, identification of negative thoughts according to the form of the thoughts, cognitive restructuring using the positive self-reflection technique, depression triggers and the standard dual technique, coping skills and problem solving.

**Category**

Treatment - Other

**2****Description**

Control group: They received no training.
