

Clinical Trial Protocol

Iranian Registry of Clinical Trials

10 Jun 2026

Comparison the effect of Nigella sativa oil and Dichlophenac Gel on the reduction of knee pain in patient with Osteoarthritis

Protocol summary

Study aim

Comparison of Nigella sativa and diclofenac gel on knee pain reduction due to osteoarthritis

Design

Two arm parallel group randomised trial with blinded postoperative outcome assessment will be performed on 70 patients during one year

Settings and conduct

This study will be performed on patients with knee osteoarthritis referred to the Ali ibn Abi Talib hospital in Zahedan for a period of one year. Patients are randomly divided into two groups receiving nigella sativa oil and diclofenac gel, and prescribed drugs will administrated for patients. Patients, data collectors and analyzer will not be aware of the drugs received

Participants/Inclusion and exclusion criteria

Including criteria consists of patients with knee osteoarthritis based on clinical and radiological criteria of the American College of Rheumatology (ACR = 2_3); satisfaction to enter the study, and non-entry conditions include joint edema; joint inflammation; liver and kidney failure; and the use of neurological drugs.

Intervention groups

The intervention group rub one gram of nigella sativa oil on a knee every six hours for three weeks, and the control group rub one gram diclofenac gel on a knee every six hours for three weeks and knee pain will measured before and one hour after taking the drug.

Main outcome variables

Pain based on the Visual Analogue Scale (VAS); The intensity of osteoarthritis based on the KellgrenLawrence scale; Patients knee conditions based on the Western Ontario and McMaster Universities Osteoarthritis Index (WOMAC)

Public title

The effect of Nigella sativa oil and Dichlophenac Gel on the reduction of knee Osteoarthritis pain

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria:

Patient with knee osteoarthritis based on ACR=2_3 and clinical standard Satisfaction to enter the study

Exclusion criteria:

Joint effusion Arthritis Liver and kidney failure
Consumption of neurological drugs

Age

No age limit

Gender

Female

Phase

3

Groups that have been masked

- Participant

Sample size

Target sample size: 70

Randomization (investigator's opinion)

Not randomized

Randomization description

Blinding (investigator's opinion)

Single blinded

Blinding description

Patients will not be aware of the type of medication they receive and the second executor of the research project will complete the questionnaire at the end of the treatment without knowledge of the two groups. Also the data will be analyzed without any information about group selection

Health conditions studied

1

Description of health condition studied

Patients with knee osteoarthritis based on clinical and radiological criteria of the American College of Rheumatology (ACR = 2_3)

ICD-10 code

80-M94

ICD-10 code description

Osteopathies and chondropathies

Primary outcomes

1

Description

Pain based on the Visual Analogue Scale (VAS)

Timepoint

At the beginning of the study (before the intervention) and 3 weeks after starting the drug administration

Method of measurement

Visual Analogue Scale

Secondary outcomes

1

Description

The intensity of osteoarthritis based on the KellgrenLawrence scale

Timepoint

At the beginning of the study (before the intervention) and 3 weeks after starting the drug administration

Method of measurement

KellgrenLawrence scale

2

Description

Patients knee conditions based on the Western Ontario and McMaster Universities Osteoarthritis Index (WOMAC)

Timepoint

At the beginning of the study (before the intervention) and 3 weeks after starting the drug administration

Method of measurement

Western Ontario and McMaster Universities Osteoarthritis Index (WOMAC)

Intervention groups

1

Description

Intervention group: rub one gram of nigella sativa oil on a knee every six hours for three weeks

Category

Treatment - Drugs

2

Description

Control group: rub one gram diclofenac gel on a knee every six hours for three weeks

Category

Treatment - Drugs
