Settings and conduct

In this study, the skin around the mouth is divided into two left and right part from the nose to the chin, firstly. Some samples are taken individually from the right and left. Then we apply Chlorhexidine 0.2% to the left side and Povidone- Iodine 10% to the right side. We immediately take some samples from the left side; but do it after three minutes for the right side. The samples will be taken by sterile swab and placed in a test tube containing TSB(Tryptic soy broth). Cultivation is carried out in the blood agar environment by swab. After 24 hours of incubation, the grown colonies will be counted and the results will be compared. The site of study is the Periodontology Department of Ahvaz Jundishapur Dentistry Faculty and the Microbiology Department of Jundishapur Medical Faculty.

Recruitment status

Recruitment complete

Funding source

Participants/Inclusion and exclusion criteria

Male healthy non smoker patients

Expected recruitment start date

2019-02-20, 1397/12/01

Expected recruitment end date

2019-04-30, 1398/02/10

Intervention groups

The samples are taken before any intervention, as well as after using Chlorhexidine 0.2% in one side and Povidone- Iodine 10% in other side, from the left and right side of skin around the mouth, separately.

Actual recruitment start date

empty

Actual recruitment end date

empty

Main outcome variables

The number of bacterial colonies

Trial completion date

empty

Health conditions studied

1

Description of health condition studied

Preoperative skin preparation

ICD-10 code

ICD-10 code description

Primary outcomes

1

Description

Number of bacterial colonies before and after applying
Chlorhexidine 0.2% and Povidone- Iodine 10% to the
perioral skin

Timepoint

Counting bacterial colonies after 24 hours incubation

Method of measurement

Counting bacterial colonies

Secondary outcomes

empty

Intervention groups

1

Description

Intervention group: first intervention group: left side of
the skin around their mouth will be prepared with
Chlorhexidine 0.2 % mouthwash Irandar Factory,
second intervention group: right side of the skin around
their mouth will be prepared with Povidone- Iodine 10%
Darudarman Factory
