Health conditions studied

1

Description of health condition studied
social anxiety

ICD-10 code
F41.8

ICD-10 code description
Other specified anxiety disorders

Primary outcomes

1

Description
social anxiety

Timepoint
At the beginning of the study, after the study (after the end of the intervention) and two months after the study

Method of measurement
Social Interaction Anxiety Scale

2

Description
Interpersonal sensitivity

Timepoint
At the beginning of the study, after the study (after the end of the intervention) and two months after the study

Method of measurement
interpersonal sensitivity measure

3

Description
Self-Compassion

Timepoint
At the beginning of the study, after the study (after the end of the intervention) and two months after the study

Method of measurement
Self-Compassion Inventory

4

Description
Sensitivity to anxiety

Timepoint
At the beginning of the study, after the study (after the end of the intervention) and two months after the study

Method of measurement
Anxiety Sensitivity Inventory -3

5

Description
External Shame

Timepoint
At the beginning of the study, after the study (after the end of the intervention) and two months after the study

Method of measurement
External Shame scale

Secondary outcomes

empty
