Scientific title

The effect of lifestyle modification on The control of gastrointestinal complications and psychological disorders post sleeve gastrectomy surgery

Public title

Lifestyle modification of patient with sleeve gastrectomy

Purpose

Education/Guidance

Inclusion/Exclusion criteria**Inclusion criteria:**

All patients who have had a sleeve gastrectomy by the method of laparoscopic surgery Patient to be have age group between 18 to 50 participants do not have drug addiction Participants to be have the minimum literacy and communication skills patient not to have drug addiction Patients who have got a final score of 0 to 59 according to DASS 21 (normal to moderate).

Exclusion criteria:

Patients who taking weight-loss medications concurrently.

Age

From **18 years** old to **50 years** old

Gender

Both

Phase

N/A

Groups that have been masked

No information

Sample size

Target sample size: **70**

Randomization (investigator's opinion)

Randomized

Randomization description

Participants were selected through available sampling, so that eligible patients were included in the study process and divided into groups A and B. Group A was the control group and group B was the test group. For this division, the blocking method was used, in which 35 cards called A and 35 cards called B were placed in an envelope. When the patient entered to the study, the patients took one of the cards and were placed in the control or test group according to the card they took (A or B). After taking each card by the patient, the card was discarded. In this way, all patients had the same chance to enter both control and test groups.

Blinding (investigator's opinion)

Not blinded

Health conditions studied**1****Description of health condition studied**

life style modification in patients with sleeve gastrectomy

ICD-10 code

K95

ICD-10 code description

Complications of bariatric procedures

Primary outcomes**1****Description**

The percentage of Gastrointestinal Complications (nausea, vomite, dumping syndrom, constipation) after sleeve gastrectomy

Timepoint

Pre and 2 month after educational intervention

Method of measurement

researcher made Questionnaire of Gastrointestinal Complications

2**Description**

The score of Psychological complication (stress, anxiety, depression) after sleeve gastrectomy

Timepoint

Pre and 2 month after educational intervention

Method of measurement

The Depression, Anxiety and Stress Scale - 21 Items (DAS S21)

Secondary outcomes

empty

Intervention groups**1****Description**

Intervention group: Life style training content to patient

with sleeve gastrectomy surgery is done through face-to-face and by using an educational pamphlet during four one-hour sessions (two sessions before surgery and two sessions after surgery) in the clinic's training room. The content of the training includes lifestyle modification in four dimensions: physical health and nutrition (diet and achieving and maintaining optimal weight), exercise and physical activity, mental health and mental health, which is prepared and based on the evidence and opinion of experts in this field. It will also be evaluated by the research team and will be implemented after approval.

Title and more details about the data/document

The part of data related to chief consequences will be shared after unrecognition of patients.

When the data will become available and for how long

6 month after results publishing in dissertation booklet.

To whom data/document is available

Student, Researchers, Patients and their Families.

Under which criteria data/document could be used

Written request to the research and Obtaining a license, can access to the part of data from researcher. Also, datas can just be used for scientific and research goals.

From where data/document is obtainable

Refer to researcher of research project with Email address: zkamali1358@gmail.com.

What processes are involved for a request to access data/document

Accomplish written Request to research assistant in university and department and after that reviewing by Research Team, and decision will make about that.
