

Clinical Trial Protocol

Iranian Registry of Clinical Trials

17 Sep 2026

Comparison of the effect of multimedia education and telephone on illness perception and hope level in patients with myocardial infarction after discharge

Protocol summary

Study aim

Comparison of the effect of multimedia education and telephone on illness perception and hope level in patients with myocardial infarction

Design

A clinical trial was conducted with two intervention groups, parallel groups, and randomized

Settings and conduct

In this clinical trial, eligible individuals were randomly assigned to multimedia education and telephone training. During the discharge, discussions were conducted with patients about the intervention, and at the end of the phone number received 3 demographic and disease characteristics questionnaires , Understanding of illness and hope was completed.

Participants/Inclusion and exclusion criteria

Inclusion Criteria: Diagnosis of myocardial infarction based on clinical symptoms and positive results of diagnostic tests . Age range 60- 30 years. Ability to use phone or mobile phone and messenger software. Exclusion Criteria: Mental and psychiatric disorders, heart failure, hearing and vision disorders, unwillingness to participate in the study

Intervention groups

Educational materials for the telephone group were telephone contacts with the patient at the first, third and sixth post-discharge period. Educational materials for the multimedia tutoring group were delivered to the patient during the course (first, third and sixth) for each person on a private page via video, picture and text messages via the messenger.

Main outcome variables

Changing of illness perception and hope level of patients with myocardial infarction

Health conditions studied

1

Description of health condition studied

myocardial infarction

ICD-10 code

I21

ICD-10 code description

ST elevation (STEMI) and non-ST elevation (NSTEMI) myocardial infarction

Primary outcomes

1

Description

Score Illness Perception by Illness Perception Questionnaire (IPQ)

Timepoint

Measure illness perception before the intervention and the sixth week after discharge

Method of measurement

Illness Perception Questionnaire (IPQ)

2

Description

Score Hope level by Miller Hope Scale (MHS)

Timepoint

Measure Hope level before the intervention and the sixth week after discharge

Method of measurement

Miller Hope Scale (MHS)

Secondary outcomes

empty

Intervention groups

1

Description

First intervention group: Calling the patient at the first, third and sixth week after discharge. Contact information will be about physical activity, diet and MI disease (disease process, causes, symptoms, diagnostic methods, medication and treatments) .

Category

Lifestyle

2

Description

Second intervention group: Educational content will be delivered to a private page for each person in a video, image and text message via a messenger to the patient

during the course (week 1, 3rd and 6th). Physical education will be about physical activity, diet, and illness (illness, causes, symptoms, diagnostic methods, medication and treatments).

Sharing plan

Deidentified Individual Participant Data Set (IPD)

No - There is not a plan to make this available

Justification/reason for indecision/not sharing IPD

University officials provide financial support and approval of the project so Publication of data is subject to permission from the university

Study Protocol

Yes - There is a plan to make this available

Statistical Analysis Plan

Yes - There is a plan to make this available

Informed Consent Form

Yes - There is a plan to make this available

Clinical Study Report

Yes - There is a plan to make this available

Analytic Code

Undecided - It is not yet known if there will be a plan to make this available

Data Dictionary

Undecided - It is not yet known if there will be a plan to make this available

Title and more details about the data/document

The study protocol, statistical analysis map, informed consent form will be provided by the Research Ethics Committee as well as the University. The results of the study will also be reported to the Department of Research and Technology of the University. The findings will also be reported in scientific articles with ethical considerations.

When the data will become available and for how long

Start of access period, 6 months after printing of results

To whom data/document is available

University officials, target hospitals, study participants, and the editor of the journal where the study results will

be published (if requested)

Under which criteria data/document could be used

For university officials who provide financial support and approval of the project, if requested to ensure good performance and, if necessary, data integrity and journal editor with written request and commitment to maintain credit (to ensure data integrity).) And, if necessary, extract the desired findings solely for submission to the article

From where data/document is obtainable

Elham Nikkhah Bidokhti, Phone number:

00989017638671

What processes are involved for a request to access data/document

After telephone call and written request within a maximum of 10 days
