Settings and conduct

The aim of this study was to investigate the effect of skin and skin contact between mother and baby on the success rate of exclusive breastfeeding, infant colic, reflux, and child growth in 3 to 5-day-old infants referred to the Valfajr Clinic. How to do skin-to-skin contact is that the mother is asked to bare her baby (diaper only) between her two bare breasts, at least 1 hour per day. The control group will not receive any training on the benefits of skin contact with the skin.

Recruitment status

Recruitment complete

Funding source

Participants/Inclusion and exclusion criteria

Entry criteria: Infants' mothers and infants within 3 to 5 days of age Mother tends to participate in the study. Mothers who have breastfed up to 3 to 5 days old. Exclusive criteria: Illiterate mothers, Mothers with conditions and illnesses that are contraindicated in breastfeeding. Infants with conditions and diseases that are contraindicated in lactation

Expected recruitment start date

2019-08-23, 1398/06/01

Expected recruitment end date

2019-10-22, 1398/07/30

Intervention groups

The mothers are in the intervention group is recommended skin-to-skin contact at least 60 minutes per day. The control group will not train on the benefits skin-to-skin contact.

Public title

Skin -to-Skin Contact Education

Purpose

Education/Guidance

Inclusion/Exclusion criteria

Inclusion criteria:
All Mother and Newborn in 3 to 5 day from life of newborn that refer to valfajre clinic

Exclusion criteria:
Illiterate mothers Mothers with conditions and disease that are contraindications to breastfeeding .Includes :Psychiatric disorders , substance abuse ,active infectious disease such as TB and AIDS ,and the use of drugs to prevent lactation such as chemotherapy drugs
Infants with conditions and disease that are contraindications to breastfeeding .includes :Cleft palate, Galactosemia , Phenylketonuria

Age
From **3 days** old to **5 days** old

Gender
Both

Phase
N/A

Groups that have been masked
No information

Sample size
Target sample size: **135**

Randomization (investigator's opinion)
Randomized

Randomization description
Blocking :At the beginning of the project , based on the random four - way blocking method , the pocket will be provided to the researcher , which at the beginning of each day will open one of them without disturbing , and the letter contained in the envelope will be based on the contract. The previous one will show that the patients will be in the intervention group(Skin -to -SKIN contact Education)that day , or in the control group.

Blinding (investigator's opinion)
Not blinded
