Health conditions studied

1

Description of health condition studied

Sexual assault victim (post-traumatic stress disorder subtype)

ICD-10 code

F43.10

ICD-10 code description

Posttraumatic stress disorder

Primary outcomes

1

Description

Depression score

Timepoint

At the beginning and end of the study and 2 months after the end of study

Method of measurement

Depression Anxiety Stress Scales - DASS

2

Description

Anxiety score

Timepoint

At the beginning and end of the study and 2 months after the end of study

Method of measurement

Depression Anxiety Stress Scales - DASS

3

Description

Intrusive thoughts

Timepoint

At the beginning and end of the study and 2 months after the end of study

Method of measurement

The Impact of Event Scale—Revised

4

Description

Shame

Timepoint

At the beginning and end of the study and 2 months after the end of study

Method of measurement

Personal Feelings Questionnaire

Secondary outcomes

empty

Intervention groups

1

Description

Intervention group: first, pre-tests will be taken. then this group receives 8 sessions of mindfulness-based art therapy. At the end of the intervention, post tests will be taken and follow-up tests will be done 2 months later

Category

Rehabilitation

2

Description

Control group: this group will be in waiting list and wont receive any interventions. The measurements for this group, will be done at the same time with test group. the intervention.follow-up measurements will be done two months later. at the end of all measurements, this group can receive 8 sessions pf mindfulness-based art therapy.
