Iranian Registry of Clinical Trials

16 Sep 2026

Development and Effectiveness of cognitive, behavioral and social interventions on smoke use prevention (CIPS) among adolescents (15-19 Years Old) pirkakran city: a community-based Mixed method Study

Protocol summary

Study aim

Determination and comparison of mean scores of cognitive variables one and six months after the intervention - Determining and comparing the mean scores of social variables one and six months after the intervention - Determination and comparison of smoking behavior in adolescents one month and six months after the intervention

Design

Samples were categorized into two sexes and each category 2 high school and secondary school will consider as a cluster. The proportion of each school will determine by the sample size(73 persons). Since the samples studied one and six months after the intervention are not necessarily the same as those before the intervention (73 persons), the researcher and the other team members have no information about the sample.

Settings and conduct

The intervention is a community-based without a control group that will take about two months. Educational intervention in the form of a city-wide exhibition on the outcomes of smoking, sending educational messages, designing educational reference sites, holding paintings on the outcomes of smoking in schools, educational sessions, etc. for some adolescents and their parents.

Participants/Inclusion and exclusion criteria

Residing in Pirkakran, Adolescents age 15-19 years

Intervention groups

The intervention is a community-based without a control group that will take about two months. Educational intervention in the form of a city-wide exhibition on the outcomes of smoking, sending educational messages through social networks, establishing banners in the environment, designing educational reference sites, holding paintings on the outcomes of smoking in schools, educational sessions, etc.

Main outcome variables

using smoking, Outcome expectancy, Self-regulation, Self-efficacy, Self-esteem, Family and School Function

Public title
Development and Effectiveness of cognitive, behavioral and social interventions on smoke use prevention (CIPS) among adolescents (15-19 Years Old): a community-based Mixed method Study

Purpose
Prevention

Inclusion/Exclusion criteria
Inclusion criteria:
Residing in Pirkakran city adolescents 15-19 Years Old
Exclusion criteria:
Questionnaires are incomplete

Age
From **15 years** old to **19 years** old

Gender
Both

Phase
N/A

Groups that have been masked
No information

Sample size
Target sample size: **73**

Randomization (investigator's opinion)
N/A

Randomization description

Blinding (investigator's opinion)
Not blinded

Blinding description

Placebo
Not used

Assignment
Single

Other design features
This study is a community-based study without a control group. All participants receive educational intervention directly and indirectly.

Title and more details about the data/document

Participants' data file, consent form, codes used in the analysis, data classification system, and statistical analysis plan will provide to the responsible persons if necessary for accuracy of the information and... The study protocol will publish as a rational model of

education to prevent smoking in adolescents The results of this study and the clinical trial report will publish in the form of an article.

When the data will become available and for how long

From the second half of the year 1399

To whom data/document is available

Research committees and responsible for the journal to verify the results of the study

Under which criteria data/document could be used

- Considering the development of the questionnaire the use of this questionnaire in future studies - the use of interventions to prevent smoking in adolescents

From where data/document is obtainable

E-mail the Research Committees and the journal responsible for the validity of the study results

What processes are involved for a request to access data/document

Valid e-mail-related research organizations
