Settings and conduct

The present study is a clinical trial study in which the impact of modified team-based learning on the knowledge and skills of Urmia Emergency Medical Personnel in trauma management will be investigated.

Recruitment status

Recruitment complete

Funding source

Participants/Inclusion and exclusion criteria

Having the consent to participate in the study; minimum education in medical diploma and related to medical emergency; no track record of attending team-based workshops; employed in the field of operation and having an employment warrant, formal, contractual, design, contractual and corporate.

Expected recruitment start date

2020-04-03, 1399/01/15

Expected recruitment end date

2020-05-04, 1399/02/15

Actual recruitment start date

Trial completion date

empty

Intervention groups

In this clinical trial study, 96 subjects will be selected by stratified random sampling and then randomly divided into control and intervention groups (each group 48). The trauma exposure intervention group will then be given a modified team-based learning approach and in the control group there will be no intervention.

Main outcome variables

Modified team-based learning

Scientific title

The Effect of Modified Team Based Learning Method on the Knowledge and Skills of Urmia Medical Emergency Personnel in Trauma Exposure in 2019-2020
