Investigating the efficacy of using scrophularia striata mouthwash in preventing dry socket in mandibular third molar

Protocol summary

Study aim

Investigating the efficacy of using scrophularia striata mouthwash in preventing dry socket in mandibular third molar

Design

This study is a double-blinded clinical trial. The study population will be included those who refer to the department of surgery of dental school of Kermanshah university of medical sciences. 140 eligible patients will be selected conveniently and randomly will be assigned to intervention and control groups.

Settings and conduct

This study that will be conducted in the dental school of Kermanshah is a double-blinded one that data analysts and researchers are kept blind to the allocation of study groups. At baseline age, sex, number and location of extracted teeth (upper and lower jaw), type of extracted tooth, cause of tooth extraction and degree of difficulty during tooth extraction are recorded in the checklist.

Participants/Inclusion and exclusion criteria

Inclusion criteria: People require tooth extraction

Exclusion criteria: People with systemic diseases including rheumatism, diabetes, lupus, MS, septicemia, hepatitis, AIDS; Pregnant women; Painful conditions such as teeth requiring root canal treatment, patients at higher risk of dry cavity; People with neurological diseases

Intervention groups

The intervention group will receive a Scrophularia striata mouthwash after tooth extraction. Control groups do not receive an intervention

Main outcome variables

Dry socket Outbreak; Rate of pain

Sample size

Target sample size: **140**

Randomization (investigator's opinion)

Randomized

Randomization description

Using the random number table, patients are divided into two groups of 70. Each patient is assigned a 4-digit code based on the random number table, Based on the right number of patients code, the patients are divided into two groups. Patients whose last digit is 0, 2, 4, 6, 8 will be assigned to the intervention group and patients whose last digit is 1,3,5, 7, 9 will be assigned to the control group.

Blinding (investigator's opinion)

Double blinded

Blinding description

In this study, data analysts and researchers are kept blind to the allocation of study groups.
