Double-blinde placebo-controlled clinical trial of effect of Silybum marianum extract capsules on systemic lupus erythematosus patients

Protocol summary

Study aim

The aim of this study is to evaluate effects of Silybum marianum fruit extract on quality of life and well-being of systemic lupus erythematosus patients

Design

This study is a double-blind and controlled trial, 35 patients with active lupus are assigned in each group. For randomization, the permuted block randomization will be used with quadruple blocks, In order to apply the concealment in the randomization process, unique codes, which is generated by the software, will be used on the drug boxes.

Settings and conduct

All patients referred to Golestan Hospital of Ahvaz, Iran, were assigned randomly in one of the treatment regimens for 4 weeks.

Participants/Inclusion and exclusion criteria

age between 18 to 50, active lupus erythematosus

Intervention groups

control group Oral capsules filled with sugar and starch 3 times per day for 1 month, intervention group: methotraxate, prednisolone and azathioprine (as main treatment) and 140 mg silybum marianum extract 3 times a day for 1 month

Main outcome variables

SLA questionnaire, lupus QOL questionnaire

Scientific title

Double-blinde placebo-controlled clinical trial of effect of Silybum marianum extract capsules on systemic lupus erythematosus patients

Public title

clinical trial of effect of Silybum marianum extract capsules on systemic lupus erythematosus patients

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria:

age 18-50 having active lupus
Exclusion criteria:
diabetes cardiovascular diseases using irrelevant drugs
with lupus pregnancy lactation

Age

From **18 years** old to **50 years** old

Gender

Both

Phase

2-3

Groups that have been masked

- Participant
- Care provider
- Investigator

Sample size

Target sample size: **70**

Randomization (investigator's opinion)

Randomized

Randomization description

For randomization, the permuted block randomization will be used with quadruple blocks. blocks will be produced by using the online site (www.sealedenvelope.com)

Blinding (investigator's opinion)

Double blinded

Blinding description

Unique codes, which is generated by the software, will be used on the drug boxes. By entering each individual into the study based on the produced sequence, the drug box in which the code is registered, will be assigned to the individual. During the research, the randomization list is held by the statistic consultant, and the participants, the project implementer and all those who participate in the measurement of the indicators will not be aware of the assigned groups

Description of health condition studied

Systemic Lupus Erythematosus

ICD-10 code

M32

ICD-10 code description

Systemic lupus erythematosus (SLE)

Primary outcomes

1

Description

Score of Quality of life questionnaire

Timepoint

At the intervention beginning and one month later

Method of measurement

Lupus QOL questionnaire

2

Description

Score of Systemic Lupus Erythematosus Activity questionnaire

Timepoint

At the intervention beginning and one month later

Method of measurement

SLA questionnaire

Secondary outcomes

1

Description

Side effects

Timepoint

One month after the intervention beginning

Method of measurement

Observation

Intervention groups

1

Description

Intervention group: Tab Prednisolone 5 mg/day, tab Methotrexate 2.5 mg/day and tabAzathioprine 50 mg/day (main treatment) with 140 mg Milk thistle capsules 3 times a day for one month

Category

Treatment - Drugs

2

Description

Control group: Oral Capsules that filled with sugar and starch 3 times per day for one month

Category

Placebo

Title and more details about the data/document

Only a part of data will be shared

When the data will become available and for how long

The access period will be 6 months after the publication of the results

To whom data/document is available

The information obtained will only be available to researchers working in universities and science centers

Under which criteria data/document could be used

Six months after the publication of this study papers, the obtained data will be available to the applicant researchers for further analysis

From where data/document is obtainable

Applicants can be contacted with corresponding author by e-mail

What processes are involved for a request to access data/document

Applicants will be able to access the obtained data from current study by sending an email to the corresponding author up to one month
