Effect of Desmopressin on bleeding in coronary artery bypass graft surgery patients undergoing cardiopulmonary bypass pump with antiplatelet drugs

Protocol summary

Summary

The purpose of this study was to evaluate the effect of Desmopressin on bleeding in coronary artery bypass graft (CABG) surgery patients undergoing cardiopulmonary bypass pump who have received antiplatelet drugs. 100 patients who are candidate for CABG enter to the study and divide into two groups. For all patients, hemoglobin, platelet count, PT, INR, PTT, BT and CT will be measured. A dose of Desmopressin is given as two drops to the first group before surgery. For the second group the same amount of normal saline is given as placebo. All patients routinely underwent coronary artery bypass graft surgery under general. After surgery, patients were transferred to ICU. Second dose of Desmopressin as two drops 6 hours after the first dose is given to the first group and the same amount of normal saline is given to second group as placebo. One hour after second dose Hemoglobin, platelet count, PT, INR, PTT and BT are checked again. Side effects include nausea and vomiting, hypotension, postoperative blood loss, need for blood transfusions and platelet transfusions during the first 24 hours were recorded.

Scientific title

Effect of Desmopressin on bleeding in coronary artery bypass graft surgery patients undergoing cardiopulmonary bypass pump with antiplatelet drugs

Public title

Effect of Desmopressin on bleeding after coronary artery bypass graft

Purpose

Prevention

Inclusion/Exclusion criteria

Inclusion criteria: Candidate for CABG; antiplatelet drugs
Exclusion criteria: Need to get an postoperative

anticoagulation

Age

From **30 years** old

Gender

Both

Phase

2-3

Groups that have been masked

No information

Sample size

Target sample size: **100**

Health conditions studied

1

Description of health condition studied

Complications of Coronary artery bypass grafting

ICD-10 code

T82.2

ICD-10 code description

Mechanical complication of coronary artery bypass and valve grafts

Primary outcomes

1

Description

Blood transfusion

Timepoint

During 24 hours after surgery

Method of measurement

Hemoglobin less than 9 by Sysmex K1000

2

Description

Platelet transfusions

Timepoint

During the first 24 hours after surgery

Method of measurement

Based on the platelet less than 100000

Secondary outcomes

empty

Intervention groups

1

Description

Intervention 1: Giving 10-40 microgram desmopressin as two drops before CABG and repeat it 6 hours later, after surgery, in ICU

Category

Treatment - Drugs

2

Description

Intervention 2: Giving 10-40 microgram normal saline as two drops before CABG and repeat it 6 hours later, after surgery, in ICU

Category

Treatment - Drugs
