Comparative Study of the Effect of Acupressure and Deep Breathing on Anxiety, Fatigue and Sleep Quality of Operating Room Personnel

Protocol summary

Study aim

1 - Comparison of anxiety, fatigue and sleep quality before and after acupressure in operating room personnel of teaching and non-teaching hospitals of Alborz University of Medical Sciences 2- Comparison of anxiety, fatigue and sleep quality before and after deep breathing exercise in operating room personnel of teaching and non-teaching hospitals of Alborz University of Medical Sciences 3- Comparison of anxiety, fatigue and sleep quality before and after touch acupuncture points in operating room personnel of teaching and non-teaching hospitals of Alborz University of Medical Sciences 4- Comparison of the effect of acupressure and deep breathing on anxiety, fatigue and sleep quality of operating room personnel in teaching and non-teaching hospitals of Alborz University of Medical Sciences

Design

Clinical Trial With control group, randomized

Settings and conduct

After determining the level of anxiety, fatigue and sleep quality of the operating room staff, the intervention will be performed on eligible individuals and two weeks and four weeks after the intervention, the questionnaires will again be completed by individuals in the three groups.

Participants/Inclusion and exclusion criteria

Inclusion criteria: staff working in the operating room of teaching and non-teaching hospitals of Alborz University of Medical Sciences, who have at least two problems. Exclusion criteria: 1. Any scars, abrasions, or deformities at points of interest for acupressure groups and touch acupuncture points 2. Pulmonary problem for deep breathing group 3. History of acupuncture and acupuncture recently used 4. Membership in yoga classes 5. Being smoker 6. Taking sedation and nerve medications 7. Having systemic illness 8. Being pregnant 9. Not wanting to participate in the study

Intervention groups

Operating room personnel who have at least two problems.

Main outcome variables

Anxiety, fatigue, quality of sleep

Scientific title
Comparative Study of the Effect of Acupressure and Deep Breathing on Anxiety, Fatigue and Sleep Quality of Operating Room Personnel

Public title
The Effect of Acupressure and Deep Breathing on Anxiety, Fatigue and Sleep Quality

Purpose
Education/Guidance

Inclusion/Exclusion criteria
Inclusion criteria:
 All Operating Room Technologists and Anesthesia Technicians Working in the Operating Room of educational and non-teaching Hospitals of Alborz University of Medical Sciences Have At least Two Dependent Variables Including Moderate to Severe Fatigue, Mild to Severe Anxiety Score, and Five or More Sleep Quality Scores
Exclusion criteria:
 The presence of any ulcers, scratches and deformities in the target points for the acupressure group (intervention group) and the touch group for acupressure points (control group) Having pulmonary problem for deep breathing group (intervention group) Having a history of acupuncture and acupuncture in the last month Be a member of yoga classes and do yoga Being a smoker Use of sedatives and nerve medications in the last month Having systemic disease Being pregnant Not willing to participate in the study

Age
No age limit

Gender
Both

Phase

Groups that have been masked
No information

Sample size
 Target sample size: **105**
 More than 1 sample in each individual
 Number of samples in each individual: **3**
 Sample 1: Before intervention, Second sample: Two weeks after intervention, Third sample: Four weeks after intervention

Randomization (investigator's opinion)
Randomized

Randomization description
 After statistical analysis of the severity of fatigue, job anxiety and sleep quality of personnel in educational and non-teaching hospitals will be determined. Then, based on the number of qualified staff and activity volume similarities, the hospitals are categorized into two categories of high and medium activity, and finally randomly blocked, medium to high activity hospitals, into three groups (Acupuncture is divided into acupressure, deep breathing. Then, the acupuncture group, the deep breathing group, and the control group in each of the

hospitals were randomly selected using a random execution table

Intervention groups

1

Description

First intervention group: In acupuncture group, for people with mild to severe anxiety and moderate to severe fatigue, apply pressure points on Liver3, Du20, Kidney3, Gallbladder20, Ying Tang (extra), Sanjiao 5, and for people with mild to severe anxiety and sleep quality. This pressure is bad at points Du20, Du24, Gallbladder 20, Sanjiao5, Ren17 and for people with moderate to severe fatigue and poor sleep quality, pressure will be at Kidney3, Stomach36, Spleen6, Liver3, DU20, DU24, Gallbladder 20 points. For those with all three problems of mild to moderate anxiety, moderate to severe fatigue, and poor sleep quality, Liver3, Kidney3, Bladder60, Stomach36, DU20, DU24, Gallbladder20, Ren17 points are prescribed to apply pressure. People are instructed to perform the techniques two to three times a day and massage each one of these points for 1-2 minutes each with a pressure massage. In addition, people in the acupuncture group are reminded that the accuracy of the points is confirmed when the client feels a little happy and the massage should never be painful and that the pressure is to the extent that they can tolerate.

2

Description

The second intervention group: Intervention group 2: For those in the deep breathing group, the first will be explained about breathing skills, deep breathing and its effects on physical and mental health, then abdominal breathing exercises (27) and full breathing (three-part breathing) with the help of film Training manuals and booklets are taught and exercises are conducted with the help of researcher guidance to verify the accuracy and correctness of the exercises. Abdominal breathing is taught to place the left hand on the chest and the right hand on the abdomen. Have a slow, deep tail through the nose. As the muscles expand gently up and down, then exhale slowly through the nose while releasing the abdominal muscles toward the ground. This should be done 12 times in the first day and 12 in the evening before dinner. Do the same on the second day 13 times in the morning and 13 times in the evening, so repeat the exercise twice a day for one week and add one breath (including one breath and one exhalation) daily. . Exercise Exercise your abdominal breathing for a week in a supine position. To make the abdominal muscles ready. They can then perform abdominal breathing exercises for the second week in a sitting position. In the third and fourth week, complete or three-part breathing exercise will be performed. For this exercise, people are required to stand on the floor, then bend their knees very slowly to lower the body so as to get into the so-called "squat" position while having a deep exhalation through the nose while lowering the body. .2. Then slowly lift the body up and open arms to the sides while starting the deep tail (abdomen extends forward). 3. Continue deep breathing and allow the chest to open. Raise your hands and let them touch each other on the head. Raise your toes simultaneously. In the final case count to 5.4. Then start deep exhale and slowly lower your hands and bend your knees and return to the initial position (squat position). Move 5 times without interruption and Pause, do in the morning and evening.
