Comparision of Eccentric & Concentric Exercises on balance in Patients with Hemiparesis

Protocol summary

Summary

The purpose of this study is to evaluate and compare the effects of eccentric exercise and concentric exercise on postural sway in hemiparetic patients. 36 hemiparetic patients that over 20 years of age, with a history of at least 6 months of suffering from hemiparesis are randomly and not blind divided into two groups. The treatment program included an eight-week (3 time per week) eccentric exercises on a treadmill for one group and an eight-week concentric exercises for the other group in the study. The eccentric exercises are carry out by running on a treadmill at 4° negative slope (downhill). The concentric exercises, however, are conduct by running at 4 degree slope (uphill) on the treadmill. The treatment exercises do with a comfortable treadmill speed for 15 minutes (plus 5 minutes warm-up and 5 minutes cool-down period) for each participant. Displacement and velocity of displacement, Before and after of intervention, in Anteroposterior and Mediolateral directions in both groups of hemiparetic patients are measure and compare.

Scientific title

Comparision of Eccentric & Concentric Exercises on balance in Patients with Hemiparesis

Public title

Effects of Eccentric & Concentric Exercises On Postural Sway in Patients with Hemiparesis

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion Criteria: Subjects with over 20 years of age, with a history of at least 6 months of suffering from hemiparesis, They are all able to run on the treadmill.

Exclusion Criteria: Subjects with cognitive impairment, a history of involvement of both hemispheres, cerebellum injuries or other neurological or orthopedic complications

affecting the feet

Age
From **20 years** old to **60 years** old

Gender
Both

Phase
2

Groups that have been masked
No information

Sample size
Target sample size: **36**

Randomization (investigator's opinion)
Randomized

Health conditions studied

1

Description of health condition studied
Hemiparasis

ICD-10 code
G-81

ICD-10 code description
Hemiplegia, unspecified

Primary outcomes

1

Description
Postural Sway

Timepoint
Before and after of intervention

Method of measurement
Force plate

2

Description
Displacement of center of pressure

Timepoint
Before and after of intervention

Method of measurement
Force plate

3

Description
Velocity of center of pressure

Timepoint
Before and after of intervention

Method of measurement
Force plate

Secondary outcomes

empty

Intervention groups

1

Description
Eccentric exercises 8 weeks (3 time per week and 20 minutes per session) downhill or uphill running protocol on the treadmill

Category
Rehabilitation

2

Description
Concentric exercises 8 weeks (3 time per week and 20 minutes per session) downhill or uphill running protocol on the treadmill

Category
Rehabilitation
