In- Vivo Bioequivalence study of Linagliptin / Metformin tablet 2.5/1000mg ABIDI (Liroprim 2.5/1000mg) with brand drugs (TRAJENTA® Duo 2.5/1000mg Boehringer Ingelheim, Germany) in Iranian healthy volunteers.

Protocol summary

Study aim

In- Vivo Bioequivalence study of Linagliptin / Metformin tablet 2.5/1000mg ABIDI (Liroprim 2.5/1000mg) with brand drugs (TRAJENTA® Duo 2.5/1000mg Boehringer Ingelheim, Germany) in Iranian healthy volunteers.

Design

Single dose, randomized, two sequences, two period crossover with a washout period.

Settings and conduct

This study will be conducted in two-way, cross-over and fasting, and on two sets of healthy volunteers. The study will be conducted in two periods of twenty-four hours. The interval between these two periods, which is called the wash-out time, is determined by the half-life of the drug plasma, which according to scientific sources should be at least 5 to 7 half-life of the drug in the case of the drug under study. The plan will take a week to clean up the drug, given the biological half-life of the drugs in the drug form. In the first round, candidates are divided into two groups, and the first group receives a test tablet and the second group receives a similar tablet. Blood samples will be taken by the volunteer by the technician immediately after taking the drug, and the preparation steps of the samples, including plasma separation and drug extraction, are performed to analyze the amount of drug on them.

Participants/Inclusion and exclusion criteria

24 participants will be selected from non-smoking, not pregnant people with no history of heart, kidney and liver disease or dis functions with both sex (male&female). The ages and BMIs of participant should be in the range of 18-60 and 18-25 respectively.

Intervention groups

Both groups received in cross-over design medication and testing at two different cross-sections and Therefore, the test results are independent of individual

differences and it will only show the difference in the formulation of the two drugs.

Main outcome variables

C_{max}, T_{max}, T_{1/2}, K_e (Elimination)

Scientific title
In- Vivo Bioequivalence study of Linagliptin / Metformin tablet 2.5/1000mg ABIDI (Liroprim 2.5/1000mg) with brand drugs (TRAJENTA® Duo 2.5/1000mg Boehringer Ingelheim, Gremany) in Iranian healthy volunteers.

Public title
Linagliptin / Metformin tablet 2.5/1000mg ABIDI (Liroprim 2.5/1000mg) , In- Vivo Bioequivalence in Iranian healthy volunteers.

Purpose
Treatment

Inclusion/Exclusion criteria
Inclusion criteria:
General health(liver, heart, kidney) Body mass index(18-28) Informed consent Age(18-60)
Exclusion criteria:
Smoking A history of cardiovascular disease A history of liver & kidney disease Pregnancy Alcohol & Drug addiction Hypersensitivity to the drug

Age
From **18 years** old to **60 years** old

Gender
Both

Phase
Bioequivalence

Groups that have been masked

- Participant

Sample size
Target sample size: **24**

Randomization (investigator's opinion)
Randomized

Randomization description
People in different age groups are invited to cooperate through the advertisement.Then people are selected. Individuals will be randomly selected through advertisements. The number of individuals will be randomly selected and the first twelve will be selected as the first sequence and the second twelve will be selected as the second sequence.

Blinding (investigator's opinion)
Single blinded

Blinding description
Candidates are not aware of the test drug or brand name.

Placebo
Not used

Assignment
Crossover

Other design features
Tow period / Tow sequence with a washout time

Secondary Ids

empty

Sharing plan**Deidentified Individual Participant Data Set (IPD)**

No - There is not a plan to make this available

Justification/reason for indecision/not sharing IPD

These data are as secure between researcher and related industries.

Study Protocol

No - There is not a plan to make this available

Statistical Analysis Plan

No - There is not a plan to make this available

Informed Consent Form

No - There is not a plan to make this available

Clinical Study Report

No - There is not a plan to make this available

Analytic Code

No - There is not a plan to make this available

Data Dictionary

Yes - There is a plan to make this available

Title and more details about the data/document

Only protocol and methods of study are sharable.

When the data will become available and for how long

After finishing of the protocol (Probably 6 months receiving IRCT code)

To whom data/document is available

Pharmaceutical and medical sciences researchers.

Under which criteria data/document could be used

Projects information's for any publications is not allowed.

From where data/document is obtainable

Contact with E-mail of the main researcher.

What processes are involved for a request to access data/document

Personal and academic details and the aim of the request.
