Health conditions studied

1

Description of health condition studied

Disorders related to short gestation and low birth weight

ICD-10 code

P07.1, P07

ICD-10 code description

Disorders related to short gestation and low birth weight, not elsewhere classified

Primary outcomes

1

Description

Maternal Self Efficacy

Timepoint

Baseline (within 1-2 days after admission in NICU) and 1 to 2 days before infants hospital discharge (18 days)

Method of measurement

Maternal Self-Efficacy will be measured by Preterm Parenting & Self-Efficacy Checklist That was developed by Pennel and colleagues in 2012. This checklist, will be measured maternal self-efficacy of premature infants in three dimensions the mother's confidence in performing tasks, understand the importance of tasks for mothers and mothers competence (the sense of achievement) with 36 questions. The total range of self-efficacy score will be between: 36-252 and between: 12-84 for each dimension. If score was less than 48, maternal self-efficacy reported as undesirable and if score was more than 48 will be reported as desirable.

2

Description

Preparation discharge

Timepoint

Baseline (within 1-2 days after admission in NICU) and 1 to 2 days before infants hospital discharge (18 days)

Method of measurement

Preparation discharge checklist was measured, that was made by Dashti and colleagues, with review of the literature. This checklist include 28 items with a score of zero and one with 12 questions about the physical condition and general health of the infant at discharge and 16 questions about the training provided to mother.

3

Description

Maternal satisfaction

Timepoint

Baseline (within 1-2 days after admission in NICU) and 1 to 2 days before infants hospital discharge (18 days)

Method of measurement

Mothers' satisfaction, with facilities, nursing care and medical care was measured through a modified pediatric family satisfaction questionnaire (PFSQ), which is modified by Saidi et al. This questionnaire include 13 questions on a Likert scale score (1-5).

Secondary outcomes

1

Description

The rate of hospital readmission

Timepoint

15 days after discharge from the hospital

Method of measurement

Through a phone call with her mother

2

Description

The length of infant' stay (day) at hospital

Timepoint

At the infant discharge from the hospital

Method of measurement

The length of infant' stay in NICU (day) at discharge time will be recorded in the data collection form.

Intervention groups

1

Description

In the control group, usual care (which includes Kangaroo mother care and breast feeding), through face-to-face training will be taught to mothers by department nurses.

Category

Other

2

Description
