Iranian Registry of Clinical Trials

10 Jun 2026

The effectiveness of education and cognitive rehearsal in managing nurses' incivility behaviors in emergency departments in Imam Hossein and Shohadaye Tajrish Hospitals

Protocol summary

Study aim

Determining the effectiveness of education and cognitive rehearsal in helping nurses to manage incivility in emergency departments

Design

Clinical trial with control group, with parallel groups and non-random assignment on 80 nurses

Settings and conduct

Completing the scale before the intervention in both groups, conducting training sessions and cognitive rehearsal in the intervention group, conducting education without cognitive rehearsal in the control group, one month later completing the scale

Participants/Inclusion and exclusion criteria

Inclusion criteria were BS degree or higher, non-participation in cognitive training courses.

Intervention groups

In the intervention group, education and cognitive rehearsal was done and in the control group, no cognitive rehearsal was performed.

Main outcome variables

managing incivility
