Clinical trial to evaluate effect of extract of Stoechas Lamiaceae in EMG-NCV criteria of patients with mild to moderate carpal tunnel syndrome

Protocol summary

Summary

(1) Objective: The aim of this study is to review Effect of extract of Stoechas Lamiaceae on mild and moderate carpal tunnel syndrome. (2) Design: In this study, 60 patients with mild to moderate carpal tunnel syndrome which their disease was confirmed by physical medicine and rehabilitation specialist will be included in the study after qualifying the inclusion and exclusion criteria and obtaining the informed consent. (3) Setting and conduct: Patients will be randomly divided to groups of thirty. For randomization we will use computerized randomization with Excel software. Inclusion criterion is clinical and electrodiagnostic demonstration of mild to moderate carpal tunnel syndrome. Exclusion criteria are clinical and electrodiagnostic severe carpal tunnel syndrome, history of trauma or fracture of the wrist, history of surgical release of nerve, signs of cervical radiculopathy in C6 - C7, systemic diseases such as neuropathies, rheumatoid arthritis, hypothyroidism, diabetes mellitus and renal failure. (4) Interventions: In intervention group wrist splint and stoechas lamiaceae extract two times a day will be administered for four weeks. On the other hand in control group wrist splint and placebo will be administered for four weeks. Patients in both groups will receive 25 mg Diclofenac tablet two times a day. They also will be advised to avoid doing severe activities with their hand. (5) Main outcome measures: Boston questionnaire score, hand forces and EMG-NCV findings will be evaluated before initiating the protocol and after finalizing the study at the end of the third week.

Scientific title

Clinical trial to evaluate effect of extract of Stoechas Lamiaceae in EMG-NCV criteria of patients with mild to moderate carpal tunnel syndrome

Public title

Effect of extract of Stoechas Lamiaceae on mild and moderate carpal tunnel syndrome

Purpose

Treatment

Inclusion/Exclusion criteria
Inclusion criterion: Clinical and electrodiagnostic demonstration of mild to moderate carpal tunnel syndrome. Exclusion criteria: Clinical and electrodiagnostic severe carpal tunnel syndrome; history of trauma or fracture of the wrist; history of surgical release of nerve; signs of cervical radiculopathy in C6 - C7; systemic diseases such as neuropathies, rheumatoid arthritis, hypothyroidism, diabetes mellitus and renal failure; collagen vascular diseases; skin allergies; age<15 and age>60

Age
From **15 years** old to **60 years** old

Gender
Both

Phase
2-3

Groups that have been masked
No information

Sample size
Target sample size: **60**

Randomization (investigator's opinion)
Randomized

Health conditions studied

1

Description of health condition studied

Carpal tunnel syndrome

ICD-10 code

G56.0

ICD-10 code description

Carpal tunnel syndrome

Primary outcomes

1

Description

EMG-NCV criteria

Timepoint

Before study and after it

Method of measurement

By using EMG-NCV device

Secondary outcomes

empty

Intervention groups

1

Description

In intervention group wrist splint and stoechas lamiaceae extract two times a day will be administered for four weeks.

Category

Treatment - Drugs

2

Description

In control group wrist splint and placebo will be administered for four weeks.

Category

Placebo
