

# Clinical Trial Protocol

## Iranian Registry of Clinical Trials

09 Jun 2026

### Study of the effect of Echium Amoenum on controlling Students' Anger

#### Protocol summary

##### Study aim

Determination and comparison of students' anger in the case and control group before and after using the Echium Amoenum

##### Design

A clinical trial with a control group, randomization

##### Settings and conduct

The researcher, after the official permission of the Islamic Azad University of Kerman Branch, conducted a preliminary interview with nursing students in accordance with ethical standards and according to pre-determined criteria, and explained the purpose of the research to them. Then anger questionnaire was completed by them. For those who scored below the average level, they were asked to complete the written consent form, then randomly divided into two groups.

##### Participants/Inclusion and exclusion criteria

The disease has no physical history. Desire to collaborate on research Do not have a history of acute and chronic mental and psychological problems. Have not participated in another research No history of drug use The absence of a specific patient in the family No divorce or death of family members Non-arrival conditions: Taking any medication pregnancy

##### Intervention groups

Intervention group: Pour 1 g of Echium amoenum powdered in 250 cc of boiling water and use after 10 minutes of oral and daily doses were taken for four weeks. control group: Does not receive anything.

##### Main outcome variables

Anger

#### General information

##### Recruitment status

**Recruitment complete**

##### Funding source

##### Expected recruitment start date

2019-05-22, 1398/03/01

##### Expected recruitment end date

2019-08-23, 1398/06/01

##### Actual recruitment start date

2019-05-22, 1398/03/01

##### Actual recruitment end date

2019-08-23, 1398/06/01

##### Trial completion date

2019-08-23, 1398/06/01

##### Scientific title

Study of the effect of Echium Amoenum on controlling Students' Anger

##### Public title

Effect of Echium amoenum on anxiety

##### Purpose

Treatment

##### Inclusion/Exclusion criteria

###### Inclusion criteria:

The disease has no physical history Desire to collaborate on research Do not have a history of acute and chronic

mental and psychological problems. Have not participated in another research No history of drug use The absence of a specific patient in the family No divorce or death of family members

**Exclusion criteria:**

Pregnancy Taking any medication

**Age**

From **19 years** old to **25 years** old

**Gender**

Both

**Phase**

N/A

**Groups that have been masked**

*No information*

**Sample size**

Target sample size: **40**

Actual sample size reached: **40**

**Randomization (investigator's opinion)**

Randomized

**Randomization description**

In this part, a simple randomization method was used. Randomization was individual and the lottery tool was used

**Blinding (investigator's opinion)**

Not blinded

**Blinding description**

**Placebo**

Not used

**Assignment**

Parallel

**Other design features**

**Secondary Ids**

empty

**Ethics committees**

**Health conditions studied**

1

**Description of health condition studied**

Anger

**ICD-10 code**

R45.4

**ICD-10 code description**

Irritability and anger

**Primary outcomes**

1

**Description**

Anger

**Timepoint**

Before the intervention and one month later

**Method of measurement**

STAXI-2 questionnaire

**Secondary outcomes**

empty

**Intervention groups**

1

**Description**

Intervention group: The consumption of Echium amoenum was carried out in such a way that one gram of powdered Echium amoenum powder was poured into 250 cc of boiling water and after 10 minutes, the beverage was consumed orally each day for one month. At the end of the first, second and third weeks, the samples were evaluated to ensure proper use of Echium amoenum, and at the end of the fourth week, the second test was re-tested, both in the two stages of the scoring method. In the control group, the interval between two tests was one month.

**Category**

Other

2

**Description**

Control group: The subjects first completed the questionnaire and were followed by a researcher to avoid any physical or mental problems. After a month, they completed the questionnaire again.
