Effect of spiritual care based on Ghalbe Salim on anxiety related to COVID-19 (corona phobia) in working women of Larestan offices in 2020

Protocol summary

Study aim

Determining the effect of spiritual care based on Ghalbe Salim on anxiety related to COVID-19 in working women of Larestan offices in 2020

Design

Randomized Clinical Trial with control and intervention group. parallel groups without blindness. on 28 working women in Larestan offices

Settings and conduct

The present study was performed on working women in Larestan offices .

Participants/Inclusion and exclusion criteria

Admission requirements: Be a woman and work in government offices. Exit conditions: Do not have the necessary conditions to do homework and accompany the program.

Intervention groups

The program of spiritual intervention based on Ghalbe Salim was based on Islamic verses and hadiths and approved by religious experts. This program included presenting solutions in four areas as follows : A) Communication with God B) Communication with yourself C) Communication with others D) Relationship with nature and environment After identifying the members of the intervention group, 6 virtual 60-minute sessions were held. The agenda of the meetings was as follows: 1.Expressing the content identified by researchers in a variety of ways, including playing short videos, audio and text for 20 to 30 minutes 2.Specify the task of the next session includes writing your opinion on a specific spiritual subject, doing a practical task such as doing a particular act of worship and expressing your feelings about it, and so on. 3.Questions and answers and summarizing the contents and feedback of the homework of the previous session for 20 minutes. The control group was selected from the same participants who had the inclusion criteria.The control group did not receive any intervention.

Main outcome variables

After the intervention, the Corona Anxiety Scale Questionnaire was completed.

Scientific title
Effect of spiritual care based on Ghalbe Salim on anxiety related to COVID-19 (corona phobia) in working women of Larestan offices in 2020

Public title
Effect of spiritual care based on Ghalbe Salim on anxiety related to COVID-19 (corona phobia)

Purpose
Supportive

Inclusion/Exclusion criteria

Inclusion criteria:
Do not have acute family problems. Have an interest and desire to participate in meetings. Have no history of diagnosed mental illness (depression, violence, etc.).

Exclusion criteria:
Withdrawal from continuing cooperation during the study
Absence from more than one session of interventions
Failure to perform assigned tasks in more than one session

Age
No age limit

Gender
Female

Phase
N/A

Groups that have been masked
No information

Sample size
Target sample size: **14**
Actual sample size reached: **14**

Randomization (investigator's opinion)
Randomized

Randomization description
The researcher extracts the list of government offices in Larestan by referring to Larestan city governor's office and writes the name of each office on a piece of paper. In the next step, the papers are entered into the envelopes and 7 envelopes are selected through simple random sampling. Therefore, 7departments are selected for sampling up to this stage. In the next step, the researcher provides ethical and scientific permission to the city governor to write letters to selected departments. Researcher explains the goals of the plan as well as the criteria for entering and leaving the study and requests from selected departments to introduce 4 working women who wants to participate in the present study through the contact number. Individuals are divided into 7 blocks of 4 by contacting the researcher and randomly assigning random blocks. Therefore, in each block, 2 people are assigned to the intervention group and 2 people to the control group Finally, 14 women are in the intervention group and 14 women are in the control group.
