

Clinical Trial Protocol

Iranian Registry of Clinical Trials

18 Sep 2026

The co-effect of sensate focus technique and position changing on sexual function in women with deep-infiltrating endometriosis three to six months after surgery

Protocol summary

Study aim

The co-effect of sensate focus technique and position changing on sexual function in women with deep-infiltrating endometriosis three to six months after surgery

Design

Phase 3 clinical trial, with control group, without blinding, randomized

Settings and conduct

Random clinical trial with control group, Endometriosis Clinic in Avicenna Research Institute, and simple randomization and evaluation of interventions one and two months after intervention training

Participants/Inclusion and exclusion criteria

Married women aged 18 to 45 years who underwent laparoscopic diagnosis and pathology with deep endometriosis and underwent surgery and referred for follow-up three to six months after surgery and have intercourse in the last 8 weeks.

Intervention groups

Intervention group: includes 40 women who have referred for follow-up 3 to 6 months after surgery and are taught sensate focus technique and position changing in a two-hour session. Control group: includes 40 women with deep endometriosis who have undergone surgery.

Main outcome variables

sexual function; Sensate focus technique; Position changing

General information

Reason for update

Recording the exact time of the start and end of the sampling of the study (the start of the sampling was postponed due to the coronavirus outbreak)

Title and more details about the data/document

Only part of the data, including information about the main outcome, can be shared

When the data will become available and for how long

Access efficiency starts from 1401

To whom data/document is available

The data will only be available to field researchers

Under which criteria data/document could be used

For further research, researchers can send a written request to the responsible author.

From where data/document is obtainable

Corresponding Author, Tarbiat Modares University,
Faculty of Medical Sciences, Department of Midwifery
and Reproductive Health

What processes are involved for a request to access data/document

After a written request from the responsible author, the request will be sent to the research unit of Tarbiat Modares University and if the rules are complied with, the analyzed data will be provided to the researchers.
