Evaluation of the effect of Lemon Balm/ Star anice in treatment of COVID-19 patients as well as their prophylactic effects in close contacts with COVID-19 patients

Protocol summary

Study aim
Evaluation of the effect of Lemon Balm or Star anice in prophylaxis in close contacts and treatment of COVID-19 patients in Bojnurd

Design
Shuffle block randomization Triple blinding Capsules and their packaging are similar in terms of their appearance. Only A, B, C have been labelled on them

Settings and conduct
Patients enrolling the clinics in Bojnurd

Participants/Inclusion and exclusion criteria
inclusion criteria Prophylactic study: Those who live with a Covid-19 patient in a single house. Have not had Covid-19 (or its symptoms) so far. Maximum 7 days have passed since start of Covid-19 symptoms Treatment study: Covid-19 patients, Maximum 7 days have passed since start of Covid-19 symptoms. Have not taken anti-virus drugs in the last 14 days exclusion criteria pregnant/ breast feeding women Underlying diseases heprsensitivity to herbal drug used in this study or their derivatives use of antiviral drugs in the last 2 weeks use of immune suppressor medicine use of serotonin inhibitor or othee sedative medicines

Intervention groups
Lemon Balm capsule Star Anice capsule Placebo

Main outcome variables
Prophylactic study: clinical/lab confirmation of the disease hospitalization due to COVID-19 death due to COVID-19 Treatment study: Changes in state of patient hospitalization due to COVID-19 death due to COVID-19

Inclusion/Exclusion criteria

Inclusion criteria:
Prophylactic study: Those who live with a Covid-19 patient in a single house. Prophylactic study: Have not had Covid-19 (or its symptoms) so far. Prophylactic study: Maximum 7 days have passed since start of Covid-19 symptoms Treatment study: Covid-19 patients Treatment study: Maximum 7 days have passed since start of Covid-19 symptoms. Treatment study: Have not taken anti-virus drugs in the last 14 days

Exclusion criteria:
pregnant/ breast feeding women Underlying diseases heprsensitivity to herbal drug used in this study or their derivatives use of antiviral drugs in the last 2 weeks use of immune suppressor medicine use of serotonin inhibitor or othee sedative medicines

Age
From **18 years** old to **60 years** old

Gender
Both

Phase
3

Groups that have been masked

- Participant
- Care provider
- Data analyser

Sample size
Target sample size: **120**

Randomization (investigator's opinion)
Randomized

Randomization description
Shuffle block randomization To conceal the data, the medicines will have same packaging and will have a single code. So that the prescriber and the researcher will not know about the medicine. Sampling will be based on shuffle block randomization. For instance the block 1 has been given below.. In sample 1 of the block one we have 1, 3, 1, group a, PP1. This shows that in block 1, having block size of 3, we give group 1 to the first sample with code PP1 Group A: treatment A, Group B: treatment B, Group C: Treatment C Block sizes: 3 block identifier, block size, sequence within block, treatment code • 1, 3, 1, group a, PP1 • 1, 3, 2, group b, CT2 • 1, 3, 3, group c, WV6

Blinding (investigator's opinion)
Triple blinded

Blinding description
Capsules and their packaging are similar in terms of their appearance. Only A, B, C have been labelled on them

Health conditions studied

1

Description of health condition studied
COVID-19

ICD-10 code
U07.1

ICD-10 code description
COVID-19, virus identified

Primary outcomes

1

Description
Prophylactic study: clinical/lab confirmation of the disease

Timepoint
weekly

Method of measurement
examination- PCR test

2

Description
Prophylactic study: hospitalization due to Covid-19

Timepoint
weekly

Method of measurement
Hospital report

3

Description
Treatment study: general state of patient
Timepoint
weekly
Method of measurement
examination

4

Description
Treatment study: hospitalization due to Covid-19
Timepoint
weekly
Method of measurement
Hospital report

5

Description
Treatment study: death due to Covid-19
Timepoint
weekly
Method of measurement
Hospital report

6

Description
Prophylactic study: death due to Covid-19
Timepoint
weekly
Method of measurement
hospital report

Secondary outcomes

empty

Intervention groups

1

Description
Intervention group 1: Lemon Balm capsule (Manobrain, Rahman Daroo)- Twice per day
Category
Treatment - Drugs

2

Description
Intervention group 2: Star Anice capsule (Manoflo-Rahman daroo)- Twice per day
Category
Treatment - Drugs

3

Description
Control group: Placebo (starch capsules with same appearance to the intervention groups)- Twice per day
Category
Placebo
