

Clinical Trial Protocol

Iranian Registry of Clinical Trials

09 Jul 2026

Outcomes of Venoplasty with stenting in patients with chronic venous insufficiency due to DVT in iliofemoral vein segment

Protocol summary

Study aim

Determining the effectiveness of venoplasty and stent placement in improving the symptoms of chronic thrombosis in the ilio-femoral venous segment.

Design

clinical trial with single group with 30 cases

Settings and conduct

Vascular Surgery Center of Golestan Hospital, Ahvaz

Participants/Inclusion and exclusion criteria

inclusion criteria include patients with symptoms of chronic venous insufficiency and previous proximal deep vein thrombosis. exclusion criteria include definitive diabetic patients and patients with severe CHF or respiratory failure.

Intervention groups

Referred patients with symptoms of chronic venous insufficiency in the lower extremities

Main outcome variables

primary patency of ipsilateral ilio femoral vein segment
0

Scientific title

Outcomes of Venoplasty with stenting in patients with chronic venous insufficiency due to DVT in iliofemoral vein segment

Public title

Outcomes of Venoplasty with stenting in patients with chronic venous insufficiency

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria:

have symptoms of chronic venous insufficiency of lower extremities evidences of previous Iliofemoral segment DVT

Exclusion criteria:

documented diabetic patients significant heart or pulmonary disease

Age

No age limit
Gender

Ethics committees

1

Ethics committee

Name of ethics committee

Ethics committee of Ahvaz Jondishapoor University of medical Sciences

Street address

Ahvaz Jundishapur University of Medical Sciences,
Deputy of research and technology.Ahvaz, Iran

City

Ahvaz

Province

Khouzestan

Postal code

15794-61357

Approval date

2020-12-13, 1399/09/23

Ethics committee reference number

IR.AJUMS.HGOLESTAN.REC.1399.110

Health conditions studied

1

Description of health condition studied

chronic venous insufficiency of lower extremities due to deep vein thrombosis

ICD-10 code

I87.2

ICD-10 code description

Venous insufficiency (chronic) (peripheral)

Primary outcomes

1

Description

patency of illio-femoral vein

Timepoint

primary patency of illio-femoral vein after 3 and 6 months after procedure

Method of measurement

Physical exam and dupler ultrasound

Secondary outcomes

1

Description

rate of edema

Timepoint

before procedure and at third and sixth month after procedure

Method of measurement

Measure the circumference of the middle part of the involved leg

2

Description

Involved leg ulcer condition

Timepoint

before procedure and at third and sixth month after procedure

Method of measurement

Observer assessment of wound condition based on Rutherford classification

3

Description

pain severity score

Timepoint

before procedure and at third and sixth month after procedure

Method of measurement

Score of pain intensity reported by the patient based on NRS criteria

Intervention groups

1

Description

Intervention group: venography and venoplasty and stenting in illio-femoral vein

Category

Treatment - Surgery
