Comparison score of laryngeal view in two facilitate laryngoscopy pressure Jaw thrust and BURP maneuvers during C-MAC video-laryngoscopy with blade D

Protocol summary

Summary

The aim of this study is Effect of airway maneuvers on glottis visualization during video-laryngoscopy in patients under general anesthesia. Design: Prospective crossover clinical trial. Setting and conduct: Tertiary regional and teaching hospital. Participants including major eligibility criteria: In class I- III physical health classification of the American society of Anesthesia , undergoing general anesthesia in Rasoul Akram Hospital during 2015-2017, were included sequentially. Intervention: Each patient serving as his or her own control, and received Burp and Jaw Trust Maneuver. Main outcome measures (variables): Cormack and Lehane grading, Laryngoscopic view change. Type of maneuver are coded and delivered to the patients by and individual not aware of the research process.

Scientific title

Comparison score of laryngeal view in two facilitate laryngoscopy pressure Jaw thrust and BURP maneuvers during C-MAC video-laryngoscopy with blade D

Public title

Effect of airway maneuvers on glottis visualization during video-laryngoscopy

Purpose

Prevention

Inclusion/Exclusion criteria

Inclusion criteria: all patients undergoing elective surgeries under general anesthesia and tracheal intubation. Exclusion criteria: emergency surgeries; patients with head or neck or airway anomalies; patients with the previous history of difficult airway; patients with diagnosed airway masses; patients with the history of

systemic diseases such as diabetes, rheumatoid arthritis etc.; patients with body mass index \geq 30.

Health conditions studied**1****Description of health condition studied**

Failed or difficult intubation

ICD-10 code

T88.4

ICD-10 code description

Failed or difficult intubation

Primary outcomes**1****Description**

View of laryngeal inlet

Timepoint

Before and instantly after intervention

Method of measurement

Cormack- Lehane scoring and grading system

2**Description**

change of laryngeal view

Timepoint

Before and instantly after intervention

Method of measurement

Cormack- Lehane scoring and grading system

Secondary outcomes**1****Description**

The success rate of intubation

Timepoint

After intervention

Method of measurement

successful or unsuccessful intubation

Intervention groups**1****Description**

Intervention group: Burp and Jaw Thrust maneuver

Category

Prevention

2**Description**

Control group: Without the maneuver
