Effect of melatonin versus placebo on clinical outcomes in patients with ischemic stroke: a double-blind randomized clinical trial

Protocol summary

Study aim

To assess the effect of melatonin versus placebo on clinical outcomes in patients with ischemic stroke

Design

This is a double-blind randomized clinical trial, phase III, in which 66 eligible patients will be randomly assigned to the intervention and control groups

Settings and conduct

The eligible patients with ischemic stroke referring to the Sina Hospital in Hamadan city during the study period will be enrolled in the trial and will be randomly assigned to the intervention and control groups through the drawing of lots. This trial will be double-blinded so that neither patients nor the physician examining the patients will be aware of the intervention.

Participants/Inclusion and exclusion criteria

Inclusion criteria: age between 18 to 85 years old; acute ischemic stroke for the first time; occurrence of stroke within the past 24 hours; focal neurological disorder; NIHSS score of at least 4 and at most 27. Exclusion criteria: pregnancy or breastfeeding; acute or chronic intracranial hemorrhage or aneurism; any type of cognitive or behavioral disorder; concurrent inflammatory disease; taking any antioxidant combination in the last month; sensitivity to melatonin.

Intervention groups

Intervention group: routine treatment plus melatonin tablets (made by Razak Pharmaceutical Co.) 20 mg daily for 5 days. Control group: routine treatment plus placebo tablets (made by School of Pharmacy, Shahid Beheshti University) 20 mg daily for 5 days.

Main outcome variables

The severity of neurological function

Scientific title

Effect of melatonin versus placebo on clinical outcomes in patients with ischemic stroke: a double-blind randomized clinical trial

Public title

Effect of melatonin versus placebo on clinical outcomes in patients with ischemic stroke

Purpose

Treatment

Inclusion/Exclusion criteria

Inclusion criteria:

Age: 18 to 85 years old
Acute ischemic stroke for the first time
Occurrence of stroke within the past 24 hours
Focal neurological disorder
NIHSS score of at least 4 and at most 27

Exclusion criteria:

Pregnancy or breastfeeding
Acute or chronic intracranial hemorrhage or aneurism
Any type of cognitive or behavioral disorder
Concurrent inflammatory disease
Taking any antioxidant combination in the last month
Sensitivity to melatonin

Age

From **18 years** old to **85 years** old

Gender

Both

Phase

3

- Outcome assessor

Sample size

Target sample size: **66**

Randomization (investigator's opinion)

Randomized

Randomization description

Random assignment of the patients to the intervention and control groups through the drawing of lots. To do this, we prepare two sheets and write "intervention" on one sheet and "control" on another. Then, by referring each patient, one of the sheets will be randomly taken and the patient will be assigned to the intervention or control group.

Blinding (investigator's opinion)

Double blinded

Blinding description

The shape of the medications and placebos will be perfectly the same. Therefore, patients will be unaware of the type of intervention. The physician who will examine the patients will not be aware of the intervention. Thus, the trial will be run as double-blind

Placebo

ICD-10 code description

Cerebral ischemia

Primary outcomes

1

Description

The severity of neurological function

Timepoint

Before the intervention and on the fifth day and one and three months after the intervention

Method of measurement

Using the National Institutes of Health Stroke (NIHSS) questionnaire and the modified Rankin Scale (mRS) questionnaire

Secondary outcomes

empty

Intervention groups

1

Description

Intervention group: routine treatment plus melatonin tablets (made by Razak Pharmaceutical Co.) 20 mg daily for 5 days

Category

Treatment - Drugs

2

Description

Control group: routine treatment plus placebo tablets including starch (made by School of Pharmacy, Shahid Beheshti University) 20 mg daily for 5 days

Category

Placebo
