Bioequivalence study of Tetrabenazine Tablet 25 mg manufactured by Hoogar Daru company

Protocol summary

Study aim

Bioequivalence study of Tetrabenazine Tablet 50 mg manufactured by Hoogar Daru Company

Design

Clinical trials of single blind design of 48 volunteers

Settings and conduct

After selecting the volunteers, Tetrabenazine drug manufactured by Hoogar Daru Company from Iran and by Lundbeck Inc of America will be prescribed to them orally in two doses with an interval of 7 days. For example, if in the first period of the drug administration, the volunteer received the drug manufactured by Hoogar Daru, in the next turn, the volunteer will receive the drug manufactured by Lundbeck Inc. Each time the amount of 6 cc of blood will be taken before drug administration and at times of 0.33, 0.67, 1, 1.25, 1.5, 1.75, 2, 2.5, 3, 4, 6, 9, 12, 24 hour after the medication is prescribed. The next sampling will 7 days later. In the second time, similar to the first time of drug administration, blood sampling will be done. In the next step, the serum and plasma of each sample are separated by centrifuge and the amount of drug in each sample is determined by liquid extraction method and using Lc Mass Mass. The study will be done in Hezareh Sevom Futuristic Pharmacist company

Participants/Inclusion and exclusion criteria

Healthy volunteers with no chronic or acute use of any drug at least 1 week before starting the study

Intervention groups

Volunteers will be divided into two groups: On the first week, group one will receive Tetrabenazine of Hoogar Daru company and group number two will receive Tetrabenazine of Lundbeck Inc. On the second week, group number one will receive Tetrabenazine of Lundbeck Inc and group number two will receive Tetrabenazine of Hoogar Daru company (cross over)

Main outcome variables

Maximum plasma concentration; area under the curve; the time taken to reach maximum plasma concentration

Scientific title

Bioequivalence study of Tetrabenazine Tablet 25 mg manufactured by Hoogar Daru company

Public title

Bioequivalence study of Tetrabenazine Tablet 25 mg manufactured by Hoogar Daru company

Purpose

Health service research

Inclusion/Exclusion criteria**Inclusion criteria:**

18 to 45 years old Sex: Males and/or non-pregnant, non-lactating females BMI: 18.5 to 24.9 weight in kg/(height in meter) Able to communicate effectively with study personnel and willingness to follow the protocol requirements as evidenced by written informed consent A physical examination with no clinically significant finding and laboratory normal tests Do not take any chronic or acute medication for at least 1 week before the start of the study No history of diseases affecting the pharmacokinetic processes of the drug

Exclusion criteria:

History of allergic responses to Tetrabenazine or other related drugs, or any of its formulation ingredients Have significant diseases (which might compromise the haemopoietic, gastrointestinal, renal, hepatic, cardiovascular, respiratory, central nervous system, diabetes, psychosis or any other body system) or clinically significant abnormal findings during screening Smokers who smoke 10 or more cigarettes per day or 20 or more biddies per day or those who cannot refrain from smoking during the study period History or evidence of drug dependence or of alcoholism or of moderate alcohol use. Volunteers who have received a known investigational drug within five elimination half life of the administered drug prior to the initial dose of study drug or who have participated in a clinical drug study or bioequivalence study within 90 days prior to the initial dose of study drug, whichever is greater found positive in urine test for drugs of abuse done before check-in of period History of difficulty in swallowing, or of any gastrointestinal disease which could affect drug absorption
