The effect of Pimpinella anisum herbal tea on milk volume in mothers and weight gain of preterm infant

Protocol summary

Study aim
Comparison weight gain of preterm infant and milk volume of mother in study groups

Design
Clinical trial study with intervention, placebo and control groups. Participants will be assigned in 6 blocks.

Settings and conduct
It is randomized clinical trail study with 3 group on 135 lactating women with preterm infant will be performed in NICU Akbarabadi hospital. Interventional group will receive 2 gr dry herbal tea of anisum in addition 1gr black tea and placebo group will receive 3 gr black tea. Mothers will consume 3 times in day of tea bag during 1 week. Mothers put 1 tea bag in glass and add 150 ml water on it and after 10 minute will drink.

Participants/Inclusion and exclusion criteria
Inclusion criteria: Mothers interest to exclusive breastfeeding, mothers interest to pumping breast, have minimum 18 years old, have normal body mass index, present of mother in hospital in special room for mother and neonate, preterm infant with gestational age less than 32 weeks, Infant hospitalization in NICU fed with NG tube. Exclusion criteria: Use of cigarette, alcohol and drugs, use of any galactogogue and complementary drug, affliction of mother to infectious transferable diseases from lactating such as HIV and active pulmonary Tuberculosis, history of infertility, diabetic mother, mother use of anticoagulation, mothers with cancer related to estrogen, mother with psychological disorder, lack of breast growth in prenatal period, performance of breast surgery, existence of some illness of mother such as mastectomy, inverted nipple, abscess, and infection mastitis, existence of congenital anomalies such as harelip and cleft palate, twin neonates.

Intervention groups
The Pimpinella anisum tea group will receive 2 grams of dried anise plant plus 1 gram of black tea and the placebo group will receive tea containing 3 grams of dried black tea.

Main outcome variables
Increased breast milk volume

Scientific title
The effect of Pimpinella anisum herbal tea on milk volume in mothers and weight gain of preterm infant

Public title
The effect of Pimpinella anisum herbal tea on milk volume in mothers and weight gain of preterm infant

Purpose
Supportive

Inclusion/Exclusion criteria

Inclusion criteria:
Mothers interest to exclusive breastfeeding Mothers interest to pumping breast with electronic pumping from third day of postpartum Have ability to read and write Have minimum 18 years old Have normal body mass index from 18.5 to 24.9 kg/m2 Present of mother in hospital in special room for mother and neonate on duration of study Preterm infant with gestational age less than 32 weeks Infant hospitalization in NICU fed with NG tube

Exclusion criteria:
Use of cigarette, alcohol and drugs Use of any galactogogue and complementary drug Affiliction of mother to infectious transferable diseases from lactating such as HIV and active pulmonary Tuberculosis History of infertility Diabetic mother Mother use of anticoagulation Mothers with cancer related to estrogen Mother with psychological disorder based on mother's self-report Lack of breast growth in prenatal period Performance of breast surgery Existence of some illness of mother such as mastectomy, inverted nipple, abscess, and infeection mastitis Existence of congenital anomalies such as harelip and cleft palate Twin neonates

Age
From **8 months** old to **8 months** old

Randomization (investigator's opinion)
Randomized

Randomization description
sample will be intered continuously in study and will be randomized in 6 blocks with 3 groups in parallel arms in interventional, placebo and control groups.

Blinding (investigator's opinion)
Single blinded

Blinding description
There is no possibility of blinding in the present study due to having a control group and only to increase the accuracy of the study, the researcher will not know the content of herbal teas given to individuals in each group.

Placebo

Health conditions studied

1

Description of health condition studied
The effect of Pimpinella anisum herbal tea on milk volume in mothers and weight gain of preterm infant

ICD-10 code

ICD-10 code description

Primary outcomes

1

Description
Determination of milk volume in mothers

Timepoint
1,2,3,4,5,6 and 7 days of study measurement of milk volume in mothers

Method of measurement
measurement of milk volume in mothers through Sweetheart medela

Secondary outcomes

1

Description
Determination of weight gain of preterm infant

Timepoint
0 days of study (before study) third days of study and

seventh days of study measurement of weight gain of preterm infant

Method of measurement

Measurement of weight of preterm infant through seca scale production of Germane county

Intervention groups

1

Description

Intervention group: The intervention group will receive Pimpinella anisum tea containing 2 grams of dried anise plant plus 1 gram of black tea and the placebo group will receive tea containing 3 grams of dried black tea.
