

Clinical Trial Protocol

Iranian Registry of Clinical Trials

11 Jun 2026

Comparison of salivary pH in students after consuming Lakido, Milk, shirakacao, carbonated beverages.

Protocol summary

Registration timing: **prospective**

Study aim

Comparison of saliva pH in students after consuming Lacido drink, milk, cocoa milk, carbonated beverage

Last update: **2021-04-14, 1400/01/25**

Update count: **0**

Design

Randomized controlled trial with control group, with parallel group; One blind, random

Registration date

2021-04-14, 1400/01/25

Settings and conduct

This study was performed in Birjand Dental School of South Khorasan Province in 1400. 80 students are randomly divided into 5 groups receiving Acido, milk, cocoa milk, carbonated beverage and water (control). At the beginning of the study, participants were collected before and immediately after drinking, 5, 20, 40 and 60 minutes after drinking. The pH will be measured by a laboratory expert.

Participants/Inclusion and exclusion criteria

Inclusion criteria include: having informed consent to participate in the study, having complete physical health, not taking antibiotics from two weeks before going to the dentist, not having a special diet, not having dry mouth, not using orthodontic plaque or prosthesis, Absence of periodontal disease and active caries and exclusion criteria: Lack of proper cooperation when drinking beverages and measuring salivary pH.

Recruitment status

Recruitment complete

Funding source

Intervention groups

Students of Birjand University of Medical Sciences with inclusion and exclusion criteria will be randomly assigned to one of the groups consuming Lacido drink, milk, cocoa milk, carbonated beverage of 80 cc.

Expected recruitment start date

2021-04-21, 1400/02/01

Expected recruitment end date

2021-06-20, 1400/03/30

Public title

Effect of some types of drinks on saliva pH

Purpose

Prevention

Inclusion/Exclusion criteria

Inclusion criteria:

Having informed consent to participate in the study
having complete physical health not taking antibiotics
from two weeks before going to the dentist not having a
special diet not having dry mouth not using orthodontic
plaque or prosthesis lack of periodontal disease lack of
caries active.

Exclusion criteria:

Lack of proper cooperation when drinking beverages
Insufficient saliva to measure pH

Age

From **18 years** old

Gender

Both

Phase

N/A

Groups that have been masked

- Outcome assessor
- Data analyser

Sample size

Target sample size: **16**

More than 1 sample in each individual

Number of samples in each individual: **6**

Saliva samples were collected in pre-drink, immediately
after drinking, 5, 20, 40 and 60 minutes after drinking in
a test tube.

Randomization (investigator's opinion)

Randomized

Randomization description

Lottery method of Simple random sampling

Blinding (investigator's opinion)

Single blinded

Blinding description

Outcome Assessor: The comprehensive research
laboratory expert assesses and reports the pH of saliva
without knowing the type of drink consumed by the
participant. The data analyzer will also analyze the data
without knowing the location of the individuals in each
group.
